Before Using Your Mini 3v Smartphone

Dell™ Mini 3v User's Guide

Safety Warnings

Safety Warnings

Read the following safety warnings carefully before using your cell phone.

- This equipment is intended for use with power supplied from the provided battery charger(s) and/or power supply unit(s). Other usage will invalidate any certification given to this product and may be dangerous.
- Switch off your cell phone when in an aircraft. Use of cellphone in an aircraft may be dangerous to the operation of the aircraft, could disrupt cellular networks, and may be illegal. Failure to observe this warning may lead to suspension or denial of cell phone services to the offender, legal action, or both.
- Do not use the cell phone or cell phone equipment when you are at a refueling point or gas station.
- Observe restrictions on the use of radio equipment in fuel depots, gas stations, chemical plants, or where blasting operations are in progress.
- You MUST exercise proper control of your vehicle at all times. Observe the following safety precautions while driving:
  - Do not use a hand-held telephone or microphone.
  - Find a safe place to stop the vehicle before you use the cell phone.
  - Do not speak into a hands-free microphone if it will distract you from driving.
  - You MUST NOT stop on the hard shoulder of a motorway to answer or make a call, except in an emergency.

NOTE: In some areas where electric current fluctuates, it is recommended that you connect the charger to an AC Voltage Regulator (AVR) instead of connecting it directly to a electric outlet. Fluctuations in electric current may damage the charger and/or the cell phone.

General Statement on RF Energy

Your cell phone has a transmitter and a receiver. When the cell phone is on, it receives and transmits radio frequency (RF) energy. When you communicate using your phone, the system handling your call controls the power level at which your phone transmits RF energy.

Proper Disposal

The symbol of the crossed out bin indicates that the product (electrical and electronic equipment) should not be placed in municipal waste. Please check local regulations for disposal of electronic products.

Setting Up Your Mini 3v Smartphone

Dell™ Mini 3v User's Guide

- Requirements
- Activating the Phone Service

Congratulations on the purchase of your Dell™ Mini 3v smartphone. Ensure that you read this manual carefully and save it for future reference.

Requirements

To use all of the phone features, you require:

- A wireless service plan with a carrier
- An Internet connection
- A computer with a USB 2.0 port

Activating the Phone Service

You must activate your phone service before you begin to use your smartphone. To activate the smartphone you must:

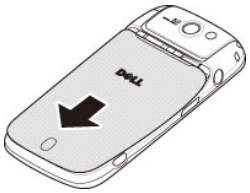
- Sign up for a service plan with a service carrier in your area
- Register the smartphone with the network

If you purchased this smartphone from a service carrier, activation may have been done during the purchase.

Some of the components (such as the battery and sometimes the SIM card) may not be installed in your smartphone at the time of purchase. You must install these components and charge the battery before you can use your smartphone.

To set up your smartphone for the first time:

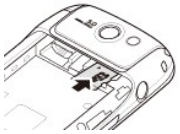
1. **Open the cover.**
   Press your thumb on the groove on the back cover and slide the back cover down.



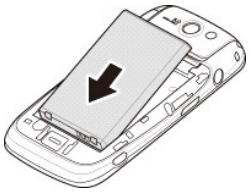
2. **Install the SIM card.**
   Hold the SIM card with the metal contacts facing down and slide the card into the SIM card holder.

   NOTE: To ensure proper installation, align the cut corners in the SIM card and the SIM card slot.

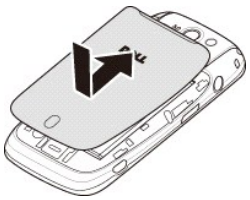
3. **Install the microSD card.**
   Hold the microSD card with the metal contacts facing down, and slide the microSD card into the microSD card holder.



4. **Install the battery.**
   Align the metal contacts on the battery with the contacts on the battery holder and insert the battery.



5. **Close the cover.**
   Insert the tabs on the cover into the slots on the smartphone and snap the cover into place.



6. **Charge the battery.**

   CAUTION: Do not use any non-approved chargers as they may damage your smartphone and invalidate any warranties.

   NOTE: It takes at least one charging-discharging cycle for the battery to reach its peak performance.

   a Using the Micro-USB to USB cable, plug the power adapter into an electric outlet and to your smartphone.

   b Charge your smartphone for at least 2 hours. Ensure that your smartphone is fully charged by checking the charge indicator on the status bar.

7. **Turn on your phone.**

   a When charging is complete, press and hold the power button for two seconds to turn on the smartphone.

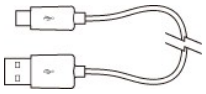
Mini 3v Accessories

Dell™ Mini 3v User's Guide

Your smartphone may ship with the following accessories:

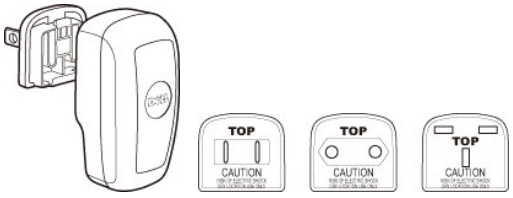
- **Micro-USB headset -** Allows you to listen to music or perform a hands-free phone conversation. Callers hear you through the integrated microphone. To use the headset, connect it to the Micro-USB connector (see "Left View").
- **Stylus -** Allows you to quickly enter text using the on-screen keyboard and handwriting tools (see "Selecting Input Method").

- **USB to Micro-USB data cable -** Allows you to connect your smartphone to a computer for file transfers and data synchronization (see "PC Sync Tool").



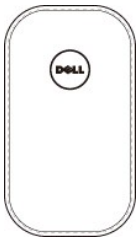
NOTE: The USB to Micro-USB cable is also use to connect to the power adapter to charge the battery.

- **Power adapter -** Use to charge the battery (see "Charge the battery").



NOTE: The type(s) and number of the power adapter plug head(s) that came with your smartphone may vary depending on the country where you purchased the smartphone.

- **Microfiber pouch -** Allows you to store the phone for protection when not in use, and to clean the screen as needed.



CAUTION: Do not use solvents, water, or other liquids to clean your smartphone. The included pouch is designed to be used dry. Liquids may damage your smartphone and invailidate any warranties.

- **3.5 mm Head Set -** Allows you to use the smartphone with hands-free operation.

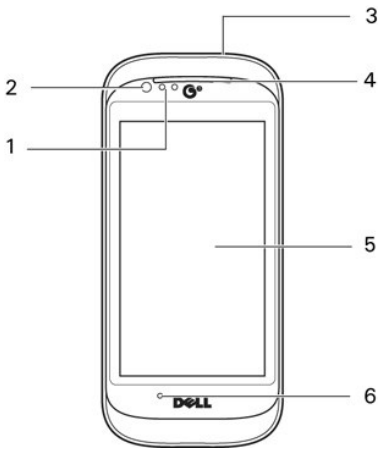
Mini 3v Smartphone Features

Dell™ Mini 3v User's Guide

- Using The Touch Screen
- Entering Text or Numbers
- Sleep Mode
- Phone Lock
- Using the Home Screen
- Connecting to the Internet
- Basic Phone Settings

Front View



1. **Proximity sensors -** Deactivates the display and touch screen when the phone is brought close to the ear during a call, to save battery power and prevent unintended phone behavior.

2. **Front Camera -** Use for video calls. The front camera is of a lower resolution than the rear camera.

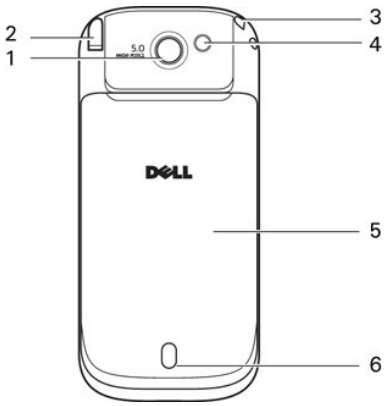
3. **Power/Mode change button -** Press and hold to turn on the phone when it is powered off. When the phone is active, press to enter sleep mode. When in sleep mode, press to wake up the phone.
   Press and hold to access the Phone options below when the phone is active:
   - Power Off - Turns off the phone
   - Normal Mode - Activates the normal alert profile
   - Vibration Mode - Activates the vibration alert profile
   - Silence Mode - Activates the silent alert profile
   - Outdoor Mode - Activates the outdoor alert profile
   - Airplane Mode - Deactivates the antenna for in-plane operations

4. **Receiver -** Use to listen to phone conversations.

5. **Touch screen -** Displays phone images.

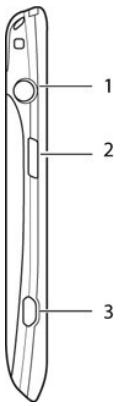
6. **Microphone -** Use for voice calls.

Back View



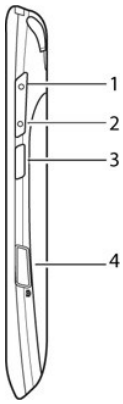
1. **Camera -** Use to take photos and capture video.
2. **Antenna -** Use to receive CMMB TV Signal.
3. **Lanyard -** Use to attach the included stylus (or a wrist strap to carry the phone).
4. **Camera flash -** Use to take photos in dim light.
5. **Cover -** Covers the battery, SIM card, and microSD card holders.
6. **Speaker -** Use to listen to music or phone conversations.

Left View



1. **Earphone jack -** Use to connect an earphone.
2. **Back / Home button -** Press once to navigate back one screen at a time. Press and hold to return to the Home screen.
3. **Micro-USB connector -** Use to charge the phone, connect to a computer, or connect to a headset.

Right View



1. **Volume up -** Press to increase the volume level.
2. **Volume down -** Press to decrease the volume level.
3. **Options button -** Press to open the Options menu.
4. **Camera button -** Press to activate the camera and take photos or capture video.

Status Bar and Status Icons

The status bar appears at the top of the screen. Icons appear on the status bar to notify you of a new message, upcoming calendar event, alarm, or other information important to you.

The following table outlines status icons:

Using The Touch Screen

This section provides information about using the touch screen.

- **Selection -** To select an item or open an application, tap the item or application with your fingertip.

  To go **back** to the previous screen, tap the Back icon or press the **Back/Home** button. To go back to the home screen, press and hold the **Back/Home** button.

1. Back icon
2. Options panel

- **Options panel -** Provides additional options for the currently selected application. To display the options panel, press the **Options** button.
- **Pop-up menu -** Tap and hold an item for about a second, and then release to view a pop-up menu of the available functions. You can scroll up or down within the menu if all the available functions are not visible on the screen.
- **Zoom in/Zoom out -** To zoom-in or zoom-out the current screen, use the zoom icons on the active application.
- **Drag items -**

  To move an item on the screen, tap and drag the item to the desired position.
- **Scroll up or down -**

  To scroll up or down in a list or on a page on the screen, slide a finger up or down on the screen.
- **Scroll right or left -**

  To scroll right or left in a menu or to go back to the previous menu, slide a finger or the stylus to the right or left on the screen.
- **Swipe down -**

  To see notifications, swipe the status bar down.

Entering Text or Numbers

When you start a program or select a field that requires text or numbers, the input panel appears automatically. You can select an input method and start entering the text. The phone may automatically suggest vocabularies or commonly used phrases as you enter text.

Your phone supports inputs in multiple languages, and provides the following input methods:

- Qwerty
- Phone KeyPad
- HandWriting

Selecting Input Method

1 Tap a text field, such as in a note or new contact, to open the input panel.

2 Tap and hold the **Switch Input Method and Language** icon to open the Switch Input Method screen.

3 Tap the input method you prefer.

1. Input panel
2. Switch Input Method and Language icon

Entering Text Using the Qwerty Keyboard

1 Tap a text field, such as in a note or new contact, to open the input panel.

2 Tap and hold the **Switch Input Method and Language** icon and select **Qwerty Keyboard** as your input method.

3 Tap the keys on the keyboard to enter text.

As you type, each letter appears above your thumb or finger. The letter is not entered until you release your finger from the key.

Changing the Input Language

Tap the **Switch Input Method and Language** icon to switch between English and Simplified Chinese.

1 Switch Input Method and Language icon

EN English

CN Simplified Chinese

Entering Numbers and Symbols

Tap the **Numbers and Symbols** icon to enter numbers and symbols.

1 ?123 Numbers and Symbols icon

2 Hide Input Panel Icon

Exiting the Input Panel

Tap the **Back** icon or the **Hide Input Panel** icon to exit the input panel.

Using the Phone KeyPad

In the Phone KeyPad, you can either enter text by entering letters similar to texting on a numeric keypad.

1 Tap a text field, such as in a note or new contact, to open the input panel.

2 Tap and hold the **Switch Input Method and Language** icon and select **Phone KeyPad** as your input method.

1 **Mode** icon

ABC mode

Smart mode

Using ABC Mode

1 Tap the **Mode** icon to switch to **ABC** mode.

2 Use a stylus or your finger to touch a key on the keypad.

3 Tap the keys repeatedly to toggle to different characters, numbers, or symbols.

4 To choose a word from the suggestion list, tap the desired word.

5 Tap the **Back** icon to exit the input panel.

1. Screen
2. Suggestion list
3. ABC mode

Using Smart Mode

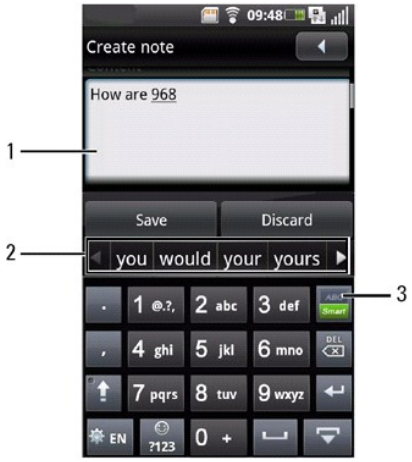
1 Tap the **Mode** icon to switch to **Smart** mode.

2 Use a stylus or your finger to touch a key on the keypad.

3 Tap a key once for each letter of the word. As you tap letters, word suggestions appear in the suggestion list.

4 To choose a word from the suggestion list, tap the desired word.

5 Tap the **Back** icon to exit the input panel.



1. Screen
2. Suggestion list
3. Smart mode

Using HandWriting

Handwriting allows you to write text across the screen using a finger or stylus.

1 Tap a text field, such as in a note or new contact, to open the input panel.

2 Tap and hold the **Switch Input Method and Language** icon and select **HandWriting** as your input method.

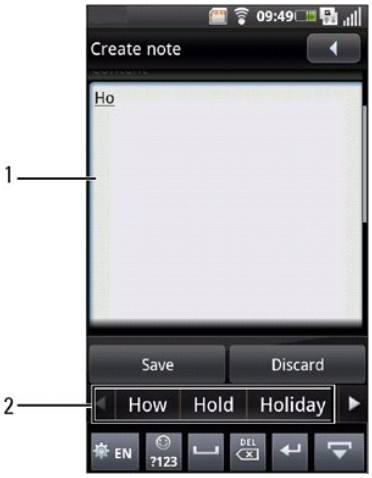
3 Use a stylus or your finger to write anywhere on the screen. The handwriting will be converted to text shortly after you lift the stylus or finger from the screen.

4 To choose a word from the suggestion list, tap the desired word.

Tap the **Switch Input Method and Language** icons to switch between English and Simplified Chinese.

Tap the **Numbers and Symbols** icon to change the input to numbers and symbols.

Tap the **Back** icon to exit the input panel.



1. Screen
2. Suggestion list

Sleep Mode

After a period of inactivity, your phone enters the sleep mode (no image appears on the display). While in sleep mode, the smartphone saves battery power.

Waking Up the Phone

1 Press the **Power** button to wake up the phone.

2 Align the moving blue circle on the lower left corner of the screen.

Phone Lock

When not on a call, you can lock the control buttons and the screen for security and to avoid accidental touch activation.

Locking the Phone

1 Tap **Settings** on the Home screen, and then tap **Security > Phone Lock Settings** to open **Phone Lock Settings** screen.

2 Enable the Phone lock function by selecting the Phone lock check box.

3 Enter a 4-8 digit phone lock password.

4 Tap **OK** to save and exit to the previous screen.

Unlocking the Phone

1 Enter the 4-8 digit phone lock password.

2 Tap **OK** to unlock your phone.

Using the Home Screen

The Home screen provides access to applications available on your smartphone. The following table lists the available applications:

Application		Description
	Mobile Music	Provides a rich mobile music experience with playlist management for both online music and local music.
	Fetion	Send free messages to friends, enjoy low charge voice group chatting and file interchange between cell phones and computers.
	139Mail	139Mail allows you to use your phone number as an email account to send and receive messages through the Internet, SMS, MMS, or WAP mobile Internet access.
	My Favorites	Includes Music, Videos, Pictures, Magic Box and other files.
	Browser	Use to access the Internet.
	MM	Use to download games, videos, and other applications.
	Monternet	Provides links to web sites for sports, entertainment, news, ringtones, games, images, video, and so on.
	Navigation	Use to track your location, find places, and get driving directions.
	Phone	Make calls and access recent callers and all your contacts or dial manually using the numeric keypad.
	Messaging	Send and receive text SMS messages.
	Contacts	View, search, add, change, or delete contacts.
	My PIM	Use to backup or restore your phonebook entries online. You can also store phonebook entries to save memory on your phone.
	Mobile TV	Use to watch TV on your phone.
	Mobile Video	Use to watch online videos.
	Mobile Stock	Use to view the current stock status.
	Mobile Reader	Use to view and download comics, books, and magazines on your phone.
	Alarm	Set up, add, or delete alarms.
	Calculator	Allows you to perform simple calculations.
	Recorder	Allows you to record audio.
	Camera	Allows you to capture pictures and videos.
	Notes	Allows you to record notes.

	Calendar	Set alerts to remind you of events, appointments, and deadlines.
	To Do List	Time management application that allows you to add time, date, priority, and status to your tasks.
	World Clock	View the time in cities around the world by adding clocks of your favorite cities.
	Dictionary	Use to look up word definitions and to add new words to the dictionary.
	File Manager	Access, use, and manage the files on the phone or the MicroSD card.
	Applications	Includes a Program Manager and Tool Box applications.
	Mail	Use to retrieve and send emails using Internet email accounts.
	Pictures	Use to view pictures stored on the memory card.
	Backup	Back up the data on your phone so you can restore the original data after a data loss.
	DCD	Service provided by your network service provider.
	DM Service	Use to find and install software updates for your phone.
	Settings	Set up connections, networks, basic functions, and applications.
	Video	Use to view and play videos stored on the memory card.
	Search	Search for contents on the phone or the SIM card.
	STK Apps	Use to access other applications provided by your network service provider.
	Call Log	Use to directly access the call history.
	Quickoffice	Open and view Microsoft® PowerPoint and Adobe PDF files and create Microsoft Word documents and Microsoft Excel spreadsheets.
	Customer Service	Use to connect directly to the customer service of your network service provider.
	Lingtu	Use to navigate the direction using the preloaded GPS system with map.
	Clock	Use to adjust the current time.

Moving Items On the Home Screen

1 To move an item from the Home screen, touch and hold the item until the item rotates and the **Delete** icon appears.

1 Selected item
2 **Delete** icon

2 Hold and drag the item to its new location.

Remove Items On the Home screen

1 To remove an item from the Home screen, touch and hold the item until the item rotates and the **Delete** icon appears.

2 Tap the **Delete** icon to remove the selected item.

Connecting to the Internet

Your phone connects to the Internet using a cellular data network.

Selecting Cellular Data Networks

You may connect to the Internet through High Speed 3G, EDGE or GPRS networks. Check your service carrier's network coverage in your area for availability.

Basic Phone Settings

This section provides information about changing the basic settings on your phone.

Tap **Settings** from the Home screen to open the **Settings** screen.

Display Settings

Display settings allow you to adjust the screen brightness, screen timeout, and screen lock settings.

To enable auto brightness:

1 Tap **Settings** from the Home screen to open the **Settings** screen.

2 In the **Phone basics** section, tap **Display settings** to open the **Display settings** screen.

3 In the **Brightness settings** section, tap the **Auto Brightness** check box to enable auto brightness.

To set brightness manually:

1 Tap **Settings** from the Home screen to open the **Settings** screen.

2 In the **Phone basics** section, tap **Display settings** to open the **Display settings** screen.

3 In the **Brightness settings** section, tap **Brightness** to open the **Brightness** panel.

NOTE: Ensure that the Auto Brightness check box is not selected.

4 Use a stylus to move the slider on the **Brightness** panel to the right or left to increase or decrease the brightness.

1 Slider

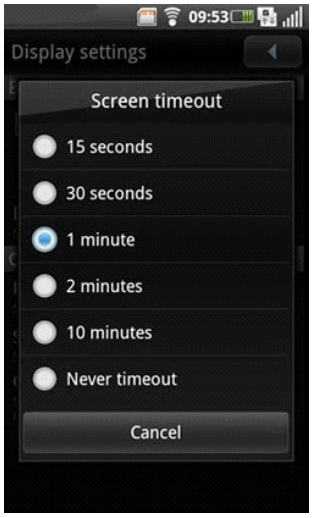
5 Tap **OK** to save and exit the **Brightness** panel.

To set screen time out:

1 Tap **Settings** from the Home screen to open the **Settings** screen.

2 In the **Phone basics** section, tap **Display settings** to open the **Display settings** screen.

3 In the **Other Display settings** section, tap **Screen timeout** to open the **Screen timeout** panel.



4 Tap to select the duration of inactivity after which you want to turn off the screen. The available options are **15 seconds, 30 seconds, 1 minute, 2 minutes, 10 minutes** and **Never timeout**.

Date & Time Settings

Date and time settings allow you to set date, time, time zone, and formats.

To set the date:

1 Tap **Settings** from the Home screen to open the **Settings** screen.

2 In the **Phone basics** section, tap **Date & time settings** to open the **Date & time settings** screen.

3 In the **Set Date and Time** section, tap **Set date** to open the **Change date** panel.

4 Slide up or down on the **Month, Day,** or **Year** field to set the date.

5 Tap **Save** to save your changes and exit the **Change date** panel.

To set the time zone:

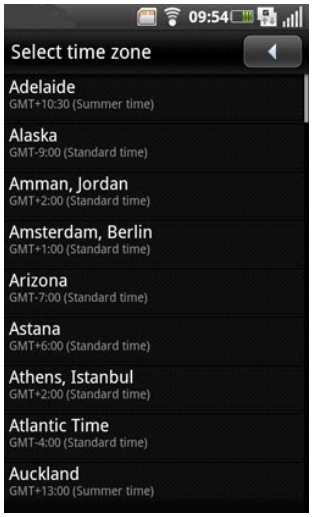
1 Tap **Settings** from the Home screen to open the **Settings** screen.

2 In the **Phone basics** section, tap **Date & time settings** to open the **Date & time settings** screen.

3 In the **Set Date and Time** section, tap **Set time zone** to open the **Set time zone** screen.

4 Slide up or down on the screen to view the entire country/time zone list.

5 Tap the time zone you desire to select.



To set the time:

1 Tap **Settings** from the Home screen to open the **Settings** screen.

2 In the **Phone basics** section, tap **Date & time settings** to open the **Date & time settings** screen.

3 In the **Set Date and Time** section, tap **Set time** to open the **Change time** panel.

4 Slide up or down on the **Hour, Minute,** and **AM/PM** fields to set the time.

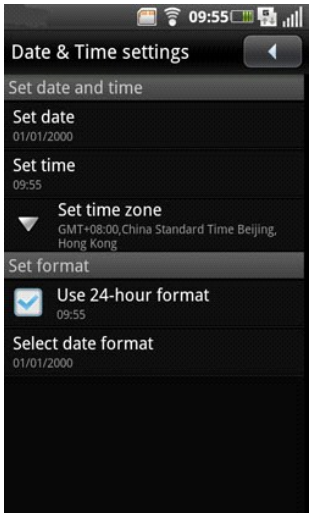
5 Tap **Save** to save your changes and exit the **Change time** panel.

To use the 24-hour format:

1 Tap **Settings** from the Home screen to open the **Settings** screen.

2 In the **Phone basics** section, tap **Date & time settings** to open the **Date & time settings** screen.

3 Tap the **Use 24-hour format** check box to use 24-hour format.



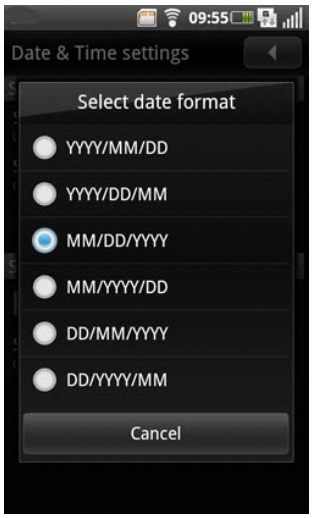
To select the date format:

1 Tap **Settings** from the Home screen to open the **Settings** screen.

2 In the **Phone basics** section, tap **Date & time settings** to open the **Date & time settings** screen.

3 Tap **Select date format** to open the **Select date format** panel.

4 Tap the date format you prefer from the list.



Location Settings

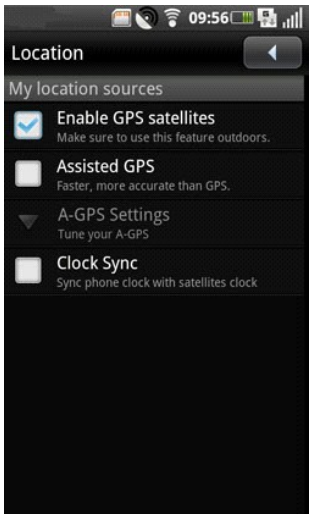
The location settings allow you to select sources for determining your location.

To set location:

1 Tap **Settings** from the Home screen to open the **Settings** screen.

2 In the **Phone basics** section, tap **My Location** to open the **My Location** screen.

3 Tap to select the appropriate check boxes to turn on the mobile networks or GPS satellites.



Language Settings

To select the display language:

1 Tap **Settings** from the Home screen to open the **Settings** screen.

2 In the **Phone basics** section, tap **Language and input > Select Language** to open the **Language** screen.

3 Tap **Select language** to select the language you prefer from the list that appears. The screen exits automatically after your selection.

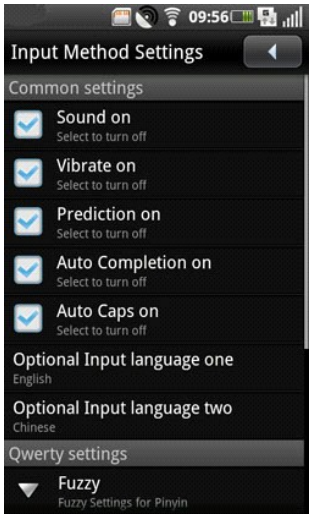
To configure the input method settings:

1 Tap **Settings** from the Home screen to open the **Settings** screen.

2 In the **Phone basics** section, tap **Language and input** to open the **Language** screen.

3 Tap **OPhone input method** to open the **Input Method Settings** screen.

4 Tap the check boxes to select the common settings you want to activate.



5 Tap **Optional Input language one** to select the first input language. Tap **Optional language two** to select the second input language.

6 Tap **Fuzzy** to configure fuzzy settings for Pinyin.

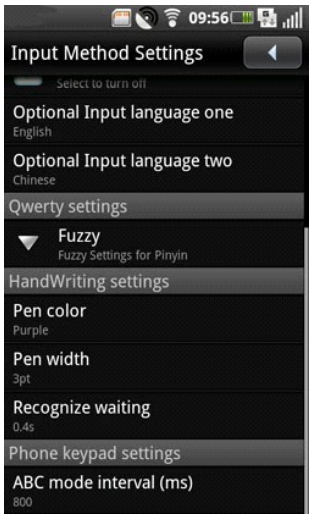
7 Tap **ABC Input mode interval (ms)** to select the phone keypad interval time.

To configure handwriting settings:

1 Tap **Settings** from the Home screen to open the **Settings** screen.

2 In the **Phone basics** section, tap **Language and input** to open the **Language** screen.

3 Tap **OPhone input method** to open the **Input Method Settings** screen.



4 To change the pen color, tap **Pen color** and then select a color.

5 To set the pen width, tap **Pen width** and then select an option.

6 To adjust the recognition time, tap **Recognize waiting**, and then select a value.

To enable autotext settings:

1 Tap **Settings** from the Home screen to open the **Settings** screen.

2 In the **Phone basics** section, tap **Language and input** to open the **Language** screen.

3 Tap **AutoText** to open the **AutoText** screen.

4 Tap the **Enable AutoText check box** to enable auto text.

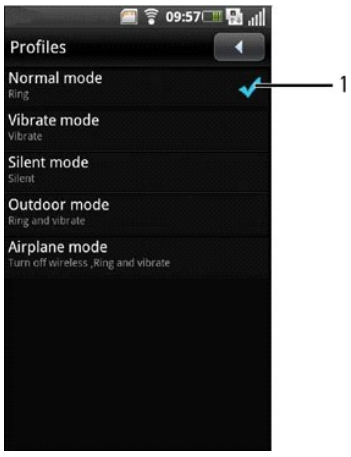
Profile Settings

You can use profile settings to set your phone to certain preset configurations.

To select a profile to use:

1 Tap **Settings** from the Home screen to open the **Settings** screen.

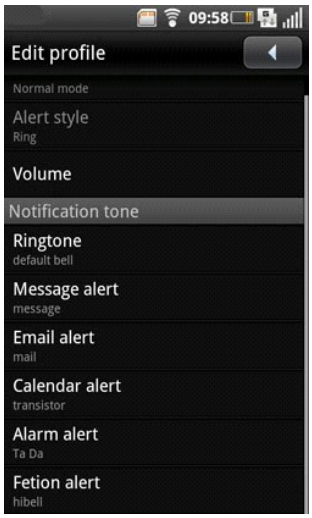
2 In the **Phone basics** section, tap **Profiles** to open the **Profiles** screen. A check mark appears next to the current profile. The available profiles include **Normal mode, Vibrate mode, Silent mode, Outdoor mode,** and **Airplane mode**.



1 Current profile

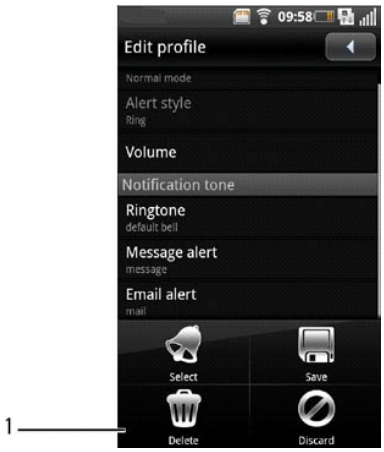
3 Tap the profile you prefer to edit.

4 In the Edit profile screen, you may set up the individual settings by tapping the options on the menu including **Alert Style, Volume, Ringtone, Message Alert, Email Alert, Calendar Alert, Alarm Alert,** and **Fetion Alert**.



5 Press the **Options** button on the phone to open the **Options** panel at the bottom.

6 In the **Options** panel, tap **Select** to activate the selected profile and exit the screen.



1 **Options** panel

To set up profiles:

1 Tap **Settings** from the Home screen to open the **Settings** screen.

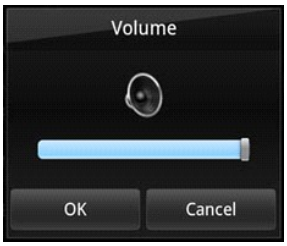
2 In the **Phone basics** section, tap **Profiles** to open the **Profiles** screen.

3 Tap the profile you want to set up.

4 In the **Edit profile** screen, setup the alert style, volume, and ring tones for different events by tapping an option from the list.

- **Alert Style -** Tap **Ring, Vibrate,** or **Ring and Vibrate** on the **Alert Style** panel to change the alert style and tap **OK** to exit.

- **Volume -** Slide a finger or the stylus to the right or left on the screen to increase or decrease the volume level and tap **OK** to close the Volume screen.



- **Ringtone -** Tap **Ringtone, Message Alert, Email Alert, Calendar Alert, Alarm Alert,** or **Fetion Alert** from the **Edit Profile** screen to open **Ringtones** screen. Tap to select the ringtone you prefer, and tap **OK** to exit.

Using Your Mini 3v Smartphone

Dell™ Mini 3v User's Guide

- Making a Call
- Contacts
- Answering or Rejecting an Incoming Call
- Accessing the Call History
- Sending SMS/MMS
- Call Settings
- Managing Bluetooth Connections
- Data Connection Settings
- WLAN Connections
- VPN Connections
- Mobile Networks
- Using ActiveSync
- Setting Security Options
- Managing SD Card and Phone Storage
- Activating SmartLearner

To make calls using your smartphone, tap a contact in the contact list or recent caller list. You can also make calls by using the on-screen dial pad.

Making a Call

To dial a number using the on-screen dialer:

1 Tap **Phone** from the Home screen to open the **Phone** screen.

2 Tap the **Phone** tab at the top of the **Phone** screen to open the on-screen dial pad.

1 **Call history** tab

2 **Phone** tab

3 **Backspace** icon

4 On-screen dial pad

5 **Voice Call** icon

3 Touch the on-screen dial pad to enter a number. Use the **Backspace** icon to make corrections.

As you dial the numbers, the phone automatically matches the numbers already stored in your Contacts list. Both the number you are dialing and the potential matches appear on the screen. If you see a match, you can tap it to place the call.

If you do not find a match, finish dialing the number and then tap **Voice call** icon to dial the number you entered.

To use the other features on your phone while you are on a call, tap the **Back** icon to hide the dial pad.

The **Ongoing call** icon is displayed on top of the Home screen during your phone call.

1 **Ongoing call** icon

To end a call:

Tap **End** to end the call.

NOTE: Placing a new phone call before ending the current call will cause your current phone call to be placed on hold.

To dial a number using video call:

1 Tap **Phone** from the Home screen to open the **Phone** screen.

2 Tap the **Phone** tab at the top of the **Phone** screen to open the on-screen dial pad.

1 **Video call** icon

3 Touch the on-screen dial pad to enter a number.

As you dial the numbers, the phone automatically matches the numbers already stored in your Contacts list. Both the number you are dialing and the potential matches appear on the screen. If you see a match, you can tap it to place the call.

If you do not find a match, finish dialing the number and then tap the **Video call** icon to dial the number you entered.

To dial a number using the call history:

1 Tap **Phone** from the Home screen to open the **Phone** screen.

2 Tap the **Call log** tab at the top of the **Dialer** screen to open the **Call history** screen.

1 **Call log** tab
2 **Phone** tab

3 Tap a contact from the list to dial the number directly.

Answering or Rejecting an Incoming Call

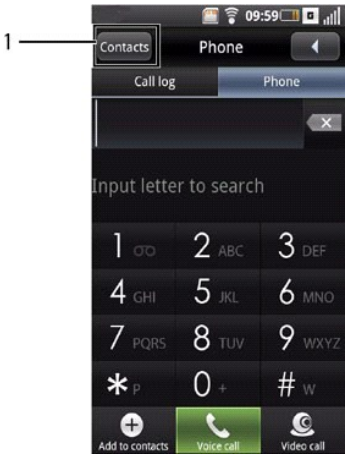
1. **Send SMS to decline call** check box
2. **Mute Ringtone** icon
   - To answer a call, tap **Answer**.
   - To reject a call, tap **Decline**.
   - To reject the call with a text message, tap the **Send SMS to decline call** check box, then tap **Decline** icon.
   - To silence the ringtone or alert, tap the **Mute Ringtone** icon.

Contacts

To look up a contact from your phonebook:

1 Tap **Phone** from the Home screen to open the **Phone** screen.

2 Tap **Contacts** at the top of the **Phone** screen.



1 **Contacts** icon

To add new contacts:

1 Tap **Phone** from the Home screen to open the **Phone** screen.

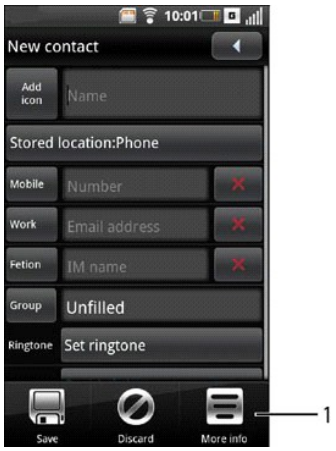
2 Tap the **Phone** tab at the top of the Phone screen to open the on-screen dial pad.

3 Tap **Add to contacts** on the Phone screen to open the **New contacts** screen.

1 **Add to contacts** icon
2 **Phone** tab

4 Tap **Create new contact**, and then tap **OK**.

5 Enter the contact information.
Tap the **Delete** icon to delete a field.



Delete icon

1 **Options** panel

To add more phone number fields, press the **Options** button. Tap **More info**, and then tap the label of the field you want to add.
To change a phone number field label, tap the field name, and then select a label.

6 Tap the **Save** icon that appears at the bottom of the screen to save the contact information and exit, or tap **Discard** to exit without saving.

To add contacts into groups:

1 Tap **Phone** from the Home screen to open the **Phone** screen.

2 Tap **Contacts** at the top of the **Phone** screen.

3 Tap **Groups** and tap the group type (**Family** or **Friends**).

4 Press the **Options** buttons and tap **Add**.

5 Select the members from the contacts list, and tap **Add members**.

To block contact(s):

1 Tap **Phone** from the Home screen to open the **Phone** screen.

2 Tap **Contacts** at the top of the **Phone** screen.

3 Tap **Block** and press the **Options** button.

4 Tap **Block**, select contacts from the contacts list and tap **Block**. When the confirmation appears on the screen, tap **OK**.

To block the phone number, tap **Add number**. Enter the phone number and tap the **Save** icon that appears at the bottom of the screen to save the information and exit, or tap **Discard** to exit without saving.

Accessing the Call History

The Call log screen lists all incoming and outgoing calls, including missed calls.

Tap either of the following to open the Call log screen:

- Tap **Call log** from the Home screen.
- Tap **Phone** from the Home screen to open the **Phone** screen, and then tap the **Call log** tab.

1 **Call log** tab

Incoming calls

Outgoing calls

Missed calls

To sort or delete entries from call history, press the **Options** button and tap the required item on the **Options** panel that appears at the bottom of the screen.

Sending SMS/MMS

1 Select an entry in the **Call log** screen to open the detailed Call log screen.

2 Tap the **Send Message** icon to send an SMS/MMS to the contact.

1 **Send Message** icon

Call Settings

The following options are available from the Call settings screen:

- Fixed Dial Number list (see "Fixed Dial Number (FDN)")
- Voice Call Barring (see "Voice Call Barring")
- Voice Call Forwarding (see "Voice Call Forwarding")
- Other Basic Call Settings (see "Other Basic Call Settings")
- Fallback to voice call
- Video call barring
- Video call forwarding
- Alternative picture
- My caller number
- Dialing prefix number
- Speed Dial (see "Speed Dial")
- Set SMS to Decline the Call (see "Set SMS to Decline the Call")
- Voicemail (see "Voicemail")
- In-Call Timer (see "In-Call Timer")
- Vibrate on MO call connected

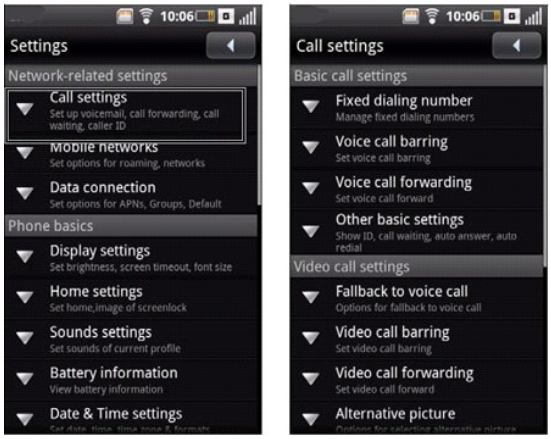
To edit your call settings:

1 Tap **Settings** from the Home screen to open the **Settings** screen.

2 In the **Settings** screen, tap **Call settings** to open the **Call settings** screen.

3 Tap the appropriate setting that you want to change.

1 2



1 Settings screen
2 Call settings screen

4 To exit the screen, tap the **Back** icon.

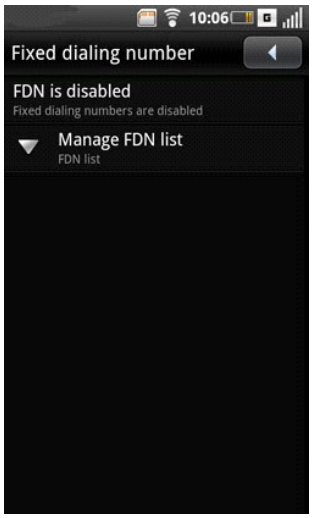
Fixed Dial Number (FDN)

The Fixed Dial Number list allows you to restrict outgoing calls from your phone to a predefined list of numbers. To enable this feature, you must know the SIM PIN2 code for your phone. You can obtain the PIN2 code from your cellular operator, provided this feature is supported.

To manage the FDN list:

1 In the **Fixed dialing number** screen, tap **FDN is disabled**. Type in your phone's PIN2 number to enable FDN feature.

2 Select **Manage FDN list**. If you have numbers stored on your SIM card you can select numbers from it. If not, you will be able to add contacts or numbers to the list.



3 To add new numbers, press the Options button, then tap **Add**.

4 Type the name and number of the contact.

5 Press the **Options** button, and then tap **Save**.

6 Enter your SIM PIN2 code. Press the **Options** button and then tap **OK**.

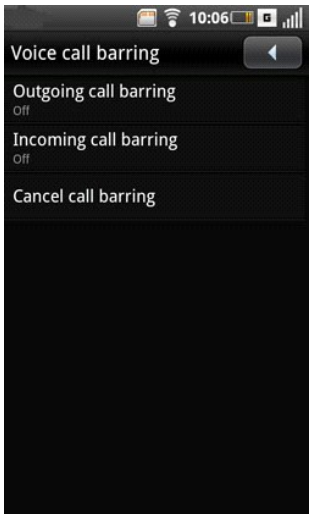
7 Continue adding numbers until you have all the contacts you want to include on the FDN list.
You may also edit or delete contacts at any time.

To disable the FDN feature, tap the **FDN Enabled** option. This changes the FDN status to **FDN Disabled**.

Voice Call Barring

The Video call barring screen allows you to enable or disable outgoing or incoming calls from a specific number or contact by using a preset password.

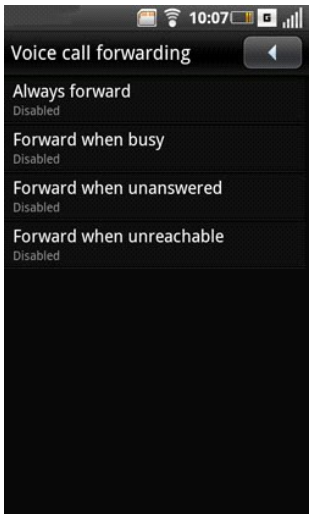
To enable or disable the call barring functions, tap the option on the screen that you want to set up.



To exit the **Voice call** barring screen, tap the **Back** icon.

Voice Call Forwarding

The Voice call forwarding option allows you to forward calls directly to your voicemail.

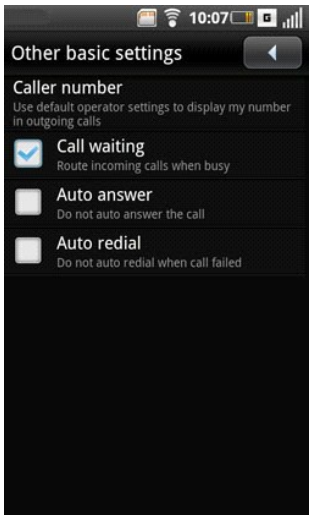


The following options are available when setting up call forwarding:

- **Always forward -** Select to specify a forwarding number and to enable this feature. When this feature is enabled, the Forward when busy, Forward when unanswered, and Forward when unreacheable features are disabled.
- **Forward when busy -** Select to enable this feature. When enabled, incoming calls are forwarded to voicemail when you are on a call.
- **Forward when unanswered -** Select to enable this feature. When enabled, incoming calls are forwarded to voicemail when unanswered.
- **Forward when unreachable -** Select to enable this feature. When enabled, calls are forwarded to voicemail if an incoming call cannot connect.

To exit this screen, tap the **Back** icon.

Other Basic Call Settings



10:07
Other basic settings
Caller number
Use default operator settings to display my number in outgoing calls
Call waiting
Route incoming calls when busy
Auto answer
Do not auto answer the call
Auto redial
Do not auto redial when call failed

The following options are available from the **Other basic settings** screen:

- **Caller number -** Select to hide or display your number to recipients of your call. When make a call, your phone number and Caller ID picture appears to your call recipient, provided the call recipient's device supports this feature.
- **Call waiting -** Select this check box to display incoming calls when you are on a call. Clear the check box to ignore incoming calls when you are already on a call.

  NOTE: When call waiting is set to ignore incoming calls, routing of the ignored call is determined by your Call forwarding settings.

- **Auto answer -** Select this check box to answer incoming calls automatically without performing any action.
- **Auto redial -** Select this check box to automatically redial a call that failed the first time.

To exit this screen, tap the **Back** icon.

Fallback to Voice Call

Fallback to voice call allows you to make voice calls when a video call fails.

1 Tap **Fallback** to voice call.

2 Tap an option:

- **Fallback manually -** Manually choose what to do when a video call fails.
- **Accept fallback request -** Makes a voice call instead of video call.
- **Reject fallback request -** Cancels the video call.

Video Call Barring

The Video call barring screen allows you to enable or disable a function to restrict outgoing or incoming calls from a specific number or contact by using a preset password.

Video Call Forwarding

Video call forwarding allows you to forward video calls to a predefined number.

The following options are available when setting up video call forwarding:

- **Always forward -** Select to specify a forwarding number and to enable this feature. When this feature is enabled, the Forward when busy, Forward when unanswered, and Forward when unreacheable features are disabled.
- **Forward when busy -** Select to specify a forwarding number and to enable this feature. When enabled, incoming video calls are forwarded to the number you specify when you are on a call.
- **Forward when unanswered -** Select to specify a forwarding number and to enable this feature. When enabled, incoming video calls are forwarded to the number you specify when unanswered.
- **Forward when unreachable -** Select to specify a forwarding number and to enable this feature. When enabled, video calls are forwarded to the number you specify if an incoming call cannot connect.

To exit this screen, tap the **Back** icon.

Alternative Picture

Alternative picture allows you to select a picture that is displayed to the recipient of your call during a video call.

My Caller Number

My caller number allows you to enter your phone's name and SIM number.

Tap **Name**, and then type your phone's name.

Tap **Number**, and then enter you SIM number.

Dialing Prefix Number

Dialing prefix number allows you to set a number to be dialed prior to making a call.

Tap the **Dialing prefix number** to enable function. Tap a text box and then enter the prefix number. You can enter **text box 2** and **text box 3** prefix numbers. Press the Options button and tap **Save** to save changes.

To exit this screen, tap the **Back** icon.

Speed Dial

The Speed dialing option allows you to set up your most frequently-used numbers for quick dialing.

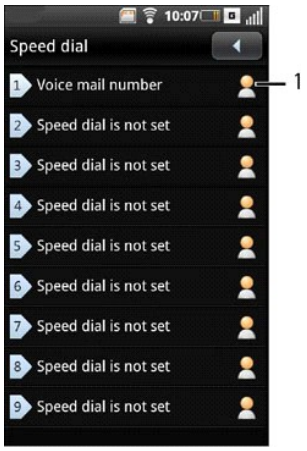
To assign speed dial from contacts:

Tap the Contacts icon, then tap the Contact you want to assign the speed dial to.

To assign speed dial by entering the number:

Tap the Speed Dial number (1 to 9), and enter the phone number for the speed dial. Press the Options button and tap **Save** to save the number.

To exit this screen tap the **Back** icon.



10:07
Speed dial
1 Voice mail number
2 Speed dial is not set
3 Speed dial is not set
4 Speed dial is not set
5 Speed dial is not set
6 Speed dial is not set
7 Speed dial is not set
8 Speed dial is not set
9 Speed dial is not set
1

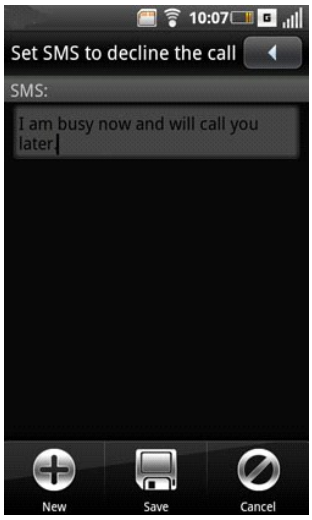
1 **Contacts** icon

To use speed dialing:

In the Home screen, tap the **Phone** icon and tap and hold the Speed dial number. For example, tap and hold 1 to call Speed dial #1.

Set SMS to Decline the Call

This feature allows you to edit a message that will automatically be sent to the caller after you have declined their call.



To save your message, press the **Options** button and tap the **Save** icon.

To add more messages, press the Options button and tap the **New** icon.

To exit this screen, tap the **Back** icon.

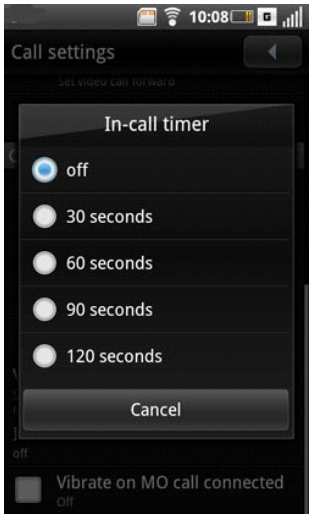
Voicemail

Your Voicemail number is set by your cellular operator and is stored on your SIM card. Use the Voicemail option to view your voicemail number.

When you have completed using the voicemail option, tap **OK** to save and exit the screen.

In-Call Timer

The in-call timer option allows you to monitor the duration of your calls. Tap an option to enable the in-call timer or tap **off** to disable the function.



Vibrate on MO Call Connected

This feature enables the phone to vibrate when a call successfully connects to the other party.

Tap the **Vibrate on MO call connected** check box to enable this function.

Managing Bluetooth Connections

Bluetooth® is a short-range wireless communication technology. Using Bluetooth technology, devices within a 10 meter range can exchange information without requiring a physical connection.

To turn on Bluetooth:

1 Tap **Settings** from the Home screen to open the **Settings** screen.

2 Tap the **Bluetooth** check box to turn on Bluetooth.

To change Bluetooth settings:

Tap **Settings > Bluetooth settings**.
- **Discoverable -** Enable Discoverable to make your smartphone discoverable to other Bluetooth devices in 120 seconds.
- **Device name -** Tap to change the name of your smartphone. This is the name that appears on other Bluetooth devices.
- **Scan for devices -** Tap to scan for Bluetooth devices.

To pair with other Bluetooth devices:

1 Ensure that Bluetooth is enabled before beginning to pair with another device.

2 Select the Bluetooth device listed in Bluetooth devices to initiate a connection.

3 You might be prompted to enter a passkey to authenticate. Enter the same passkey on both devices, or enter the specific passkey provided by the device manufacturer.

Data Connection Settings

Select this setting to set your default data connection for multimedia.

Tap **Settings > Data connection**.
- **Data on boot -** Enable Data on boot to connect to data services when the smartphone boots up.
- **Data roaming -** Enable Data roaming to connect to data services when roaming outside your network service area.

NOTE: Significant roaming charges may be incurred when using data roaming. Consult your service provider before enabling this option.

To add an access point:

1 Tap **Settings > Data connection**.

2 Press the **Options** button, and then tap **Add**.

3 Enter the access point name.

4 Press the **Options** button, and then tap **Save** to save the access point.

WLAN Connections

Wireless Local Area Network (WLAN) allows you to connect to the Internet when you are within 100 meters of a wireless access point.

To turn on WLAN:

1 Tap **Settings > Wireless LAN Settings**.

2 Tap the **WLAN** check box.

To change the WLAN settings:

Tap **Settings > Wireless LAN Settings > WLAN Settings** to set up and manage wireless access points.

Tap the **Network notification** check box for the phone to display or sound an alert when an open network is available.

To add a WLAN network:

1 Tap **Settings > Wireless LAN Settings > WLAN Settings > Add a WLAN network** to search and add a new network manually.

2 Enter the **network SSID, Type, Security,** and other connection settings.

NOTE: The **Add a WLAN network** screen may vary depending on the selected Security setting.

3 Tap **Save** to add the WLAN network.

To connect to a WLAN network:

1 Tap an available network on the list.

2 When prompted, enter the security password.

3 Tap **Connect**.

VPN Connections

The virtual private network (VPN) technology helps enable cost-effective and secure remote access to private networks.

To add a VPN connection:

1 Tap **Settings > VPN settings > WLAN Settings > Add VPN**.

2 Tap either of the following:

- **Add PPTP VPN -** Select this option to add VPN using Point-to-Point Tunneling Protocol.
- **Add L2TP VPN -** Select this option to add VPN using Layer 2 Tunneling Protocol.
- **Add L2TP / IPSec PSK VPN -** Select this option to add VPN using Pre-shared key based L2TP/IPSec VPN.
- **Add L2TP / IPSec CRT VPN -** Select this option to add VPN using Certificate based L2TP/IPSec VPN.

3 Enter the **VPN name, Set VPN Server,** and other connection settings.

NOTE: The required connection settings vary depending on the selected protocol.

4 Press the **Options** button, and tap **Save**.

Mobile Networks

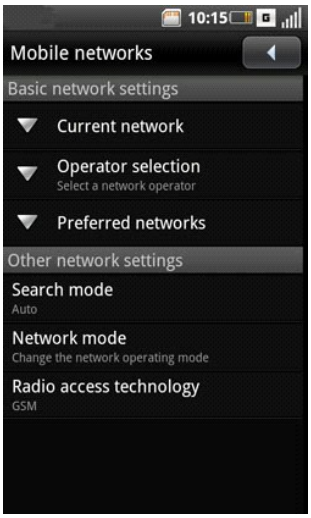
The Mobile network settings enable you to set options for roaming and networks.

Tap **Settings > Mobile networks**.

Configuring Mobile Networks

The following options are available in the Mobile networks screen.

- **Current network -** Select this setting to view your current network.
- **Operator selection -** Use this setting to select a network operator.
- **Preferred networks -** Select this setting to set network preferences.
- **Search mode -** Select this setting to set the search mode to manual or auto.
- **Network mode -** Select this setting to set the network mode.
- **Radio access technology -** Select this setting to set the radio access technology.



Using ActiveSync

ActiveSync allows you to sync email, contacts, calendar, and tasks with an Exchange server.

Adding an Account

1 Tap **Settings > ActiveSync**.

2 Tap **Add account**.

3 Enter the **Email address, Sync Server Address, User Name, Password, Domain,** and **From Name**.

4 Tap **Next** to save account settings.

Setting Security Options

Tap **Settings > Security**.

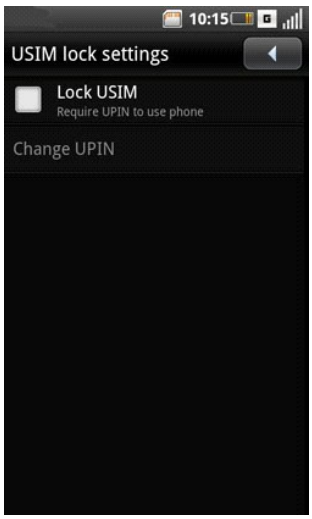
The following settings are available in the **Security settings** screen.

- **USIM lock settings -** Select this setting to enable USIM card lock and change its settings.
- **Phone lock settings -** Select this setting to enable phone lock and change its settings.

- **Change PIN2 -** Select this setting to change PIN2.
- **Change call barring password -** Select this setting to change the call barring password.
- **Change factory password -** Select this setting to change the factory password.
- **Restore factory password -** Select this setting to restore the factory password.
- **Credential storage -** Select this setting to allow applications to access secure certificates and other credentials.

USIM Card Lock

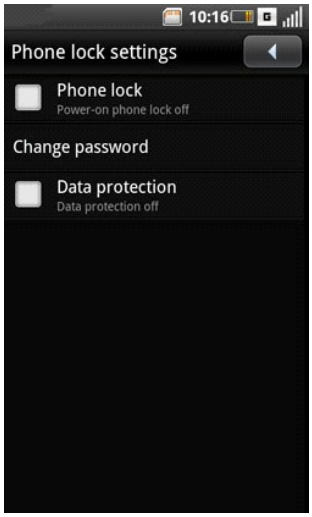
Select this setting to open USIM Card lock settings where you can enable the USIM Card lock and change your pin code.



- **Lock USIM card -** Select this check box to lock your USIM card.
- **Change UPIN code -** Select this setting to change your USIM card PIN code.

Phone Lock Settings

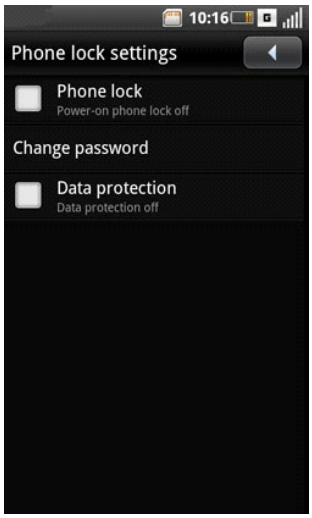
Select this setting to open Phone lock setting where you can enable Phone lock and change your password.



- **Phone lock -** Select this check box to enable or disable phone lock.
- **Change password -** Select this setting to change the password for your phone.
- **Data protection -** Select this setting to turn on data protection.

Using Credential Storage

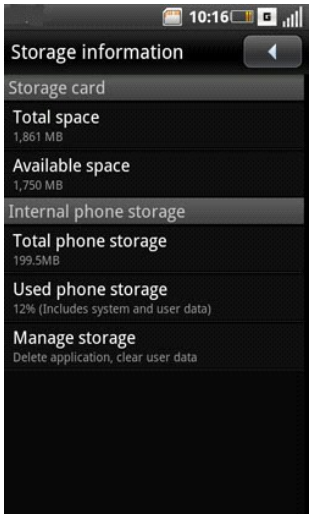
Select this setting to allow applications to access secure certificates and other credentials.



- **Use secure credentials -** Select this check box to enable or disable credential storage.
- **Install from storage card -** Select this setting to install encrypted certificates from the storage card.
- **Set password -** Select this setting to set or change the credential storage password.
- **Clear storage -** Select this setting to delete all credentials and reset the credential storage password.

Managing SD Card and Phone Storage

Tap **Settings > Storage information** to view storage information such as **Total space, Available space, Total phone storage, Used phone storage,** and to **Manage storage** of your phone and SD card.



Activating SmartLearner

Tap **Settings > SmartLearner** to enable or disable the SmartLearner function.

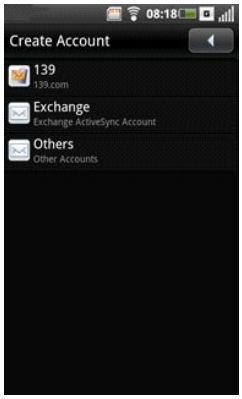
Managing Email Accounts

To add an Email account:

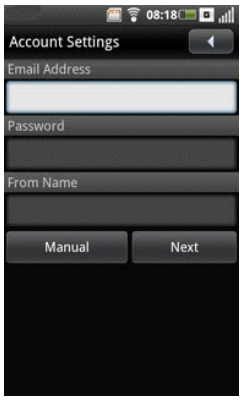
1 Tap **Mail** from the Home screen.

2 Tap an email account from the Account Settings to open the account input screen. If the account is not listed on screen, tap **Others** to create a new account manually.



NOTE: Contact your email providers for the required setup information.

3 Enter your **Email address**, **Password**, and **From Name**.

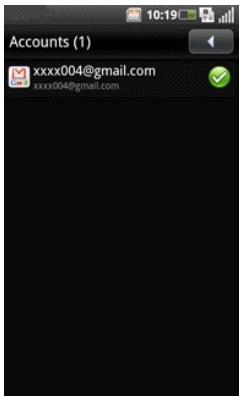


4 Tap **Next** to save your account settings. The Accounts screen appears.

5 Tap the account you just set up to open your email account and start sending and receiving emails.

6 To exit this screen, tap the **Back** icon.

To add more accounts, press the **Options** button and tap **New** on the Options panel.



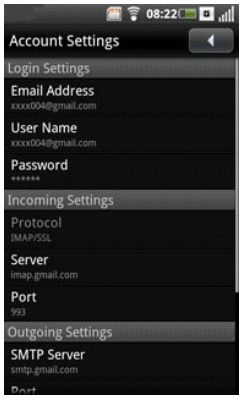
To edit an Email account:

1 Tap to select the email account you want to edit.

2 Press the **Options** button and tap **Account Settings**.

3 Scroll through the list and select the setting you want to change.

4 Press the **Options** button, and tap **Save** to save the settings.



The following are the available **Email account** settings:

- **Email Address**— Select this setting to edit your email address.
- **User Name**— Select this setting to edit your user name.

- **Password**— Select this setting to edit your password for the account.
- **Protocol** — Select this setting to choose the protocol to be used to send and receive emails including POP3, POP3/SSL, CMPCP, and CMPCP/SSL. Contact your service provider for information.
- **Server**— Select this setting to edit the address of the server that provides your mail.
- **Port (incoming)**— Select this setting to edit the port value used for incoming mails.
- **SMTP Server**— Select this setting to edit the address of the server through which your mail is routed.
- **Port (outgoing)**— Select this setting to edit the port value used for outgoing mails.
- **Authentication**— Select this setting to select the authentication type for your mail.
- **Data Connection** — Select this setting to select the CMCC network to use for data connection.

The advanced settings include:

- **Delete email from server** — Select this setting to choose how emails are deleted from the server.
- **Reply with the original** — Select this check box to include the original messages when you reply mails.
- **Poll Frequency** — Select this setting to select how often automatic POP3 retrievals are performed.
- **Read Limit** — Select this setting to set the read limit for your emails if you wish to set a send/receive message size limit. You can select Headers Only, First 5k, First 10k, or Entire Message. Notice that setting the limit to Headers Only will allow you to only see the message subjects.
- **Number to fetch each time** — Select this setting to set the number of emails to fetch each time.
- **From name** — Select this setting to edit your full name displayed to recipients.
- **Auto Delete Mail Settings** — Select this setting to set the frequency of deleting your mails.
- **Signature** — Select this setting to insert your signature in mails.
- **Enable Security** — Select this setting to prompt for a security password.
- **Set Security Password** — Select this setting to set the security password.

To delete an Email account:

1 In the Home screen, tap the **Mail** icon.

2 Tap and hold the email account you want to delete.

3 In the menu that appears, tap **Delete Account** to remove the account.

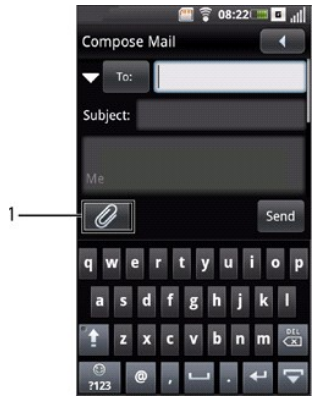
4 Tap the **Back** icon to exit the screen.

Managing Email Messages

To send Email messages:

1 In the Home screen, tap the **Mail** icon, and tap an email account to open the email screen.

2 Tap **New** to open the **Compose Mail** screen.



1 **Attachment** icon

3 Enter the recipient's email address, Subject, and message.

4 Press the **Options** button to select **CC / BCC** or Priority on the Options panel.

5 To attach a file, tap the **Attachment** icon.

6 To send the Email, tap **Send**.

7 To exit this screen, tap the **Back** icon.

To receive Email messages:

1 In the Home screen, tap **Mail** icon, and tap an email account to open the email screen. The email screen displays the **Inbox, Sent, Drafts, Outbox,** and **Trash**.

2 Press the **Options** button and select **Receive / Send** on the Options panel to receive new mails.

1 **Receive / Send** icon

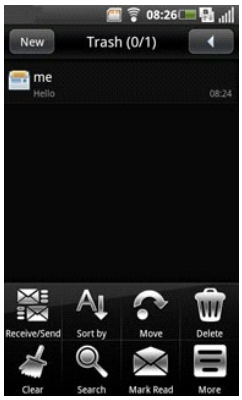
3 Tap **Inbox** to open the inbox folder and read your mails.

4 To exit this screen tap the **Back** icon.

To delete Email messages:

1 In the Home screen, tap **Mail** icon, and tap an email account to open the email screen.

2 Tap **Inbox** to open the inbox folder.



3 Press the **Options** button and tap **Delete** from the Options panel.

4 Tap the check box that appear beside the message you want to delete. To select all messages, tap **Select All**.

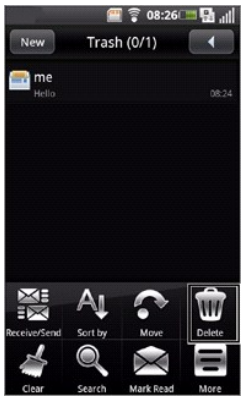
5 Tap **Delete**. The message is moved to the **Trash** folder.

6 Tap the **Back** icon to exit this screen.

To delete Email messages permanently:

1 In the Home screen, tap **Mail** icon, and tap an email account to open the email screen.

2 Tap **Trash** to open the Trash folder.



3 Press the **Options** button and tap **Delete** on the Options panel

4 Tap the check box that appear beside the message you want to delete. To select all messages, tap **Select All**.

5 Tap **Delete**.

6 Tap the **Back** icon to exit this screen.

Fetion

Fetion is a messaging application that allows you to send free messages to friends, make low cost voice group chats and exchange files between cell phones and computers. Go to **www.fetion.com.cn** for more information and download Fetion for your phone.

To open Fetion, tap **Fetion** from the Home screen. You are logged in automatically if **Auto Login Fetion** is enabled.

To manage your Fetion account and messages:

1 In the Home screen, tap the **Fetion** icon.

2 Press the **Options** button to open the options panel.

3 To log on to Fetion manually, tap **Login** on the Options panel.

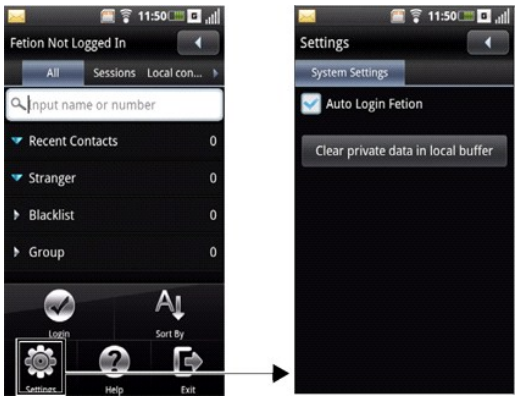
4 To sort your messages, tap **Sort By**.

5 To get help, tap **Help**.

6 To exit Fetion, tap **More** and then tap **Exit**.

To change Fetion settings:

In the Home screen, tap the **Fetion** icon, and press the **Options** button to select **Settings**.



Select the appropriate Fetion settings you want to change:

- **Auto Login Fetion** — Select this check box to enable auto login.
- **Clear local buffer** — Select to clear private data.

My Favorites

Dell™ Mini 3v User's Guide

My Favorites allows you to watch videos, capture and view photos, and listen to and record audio files on your phone.

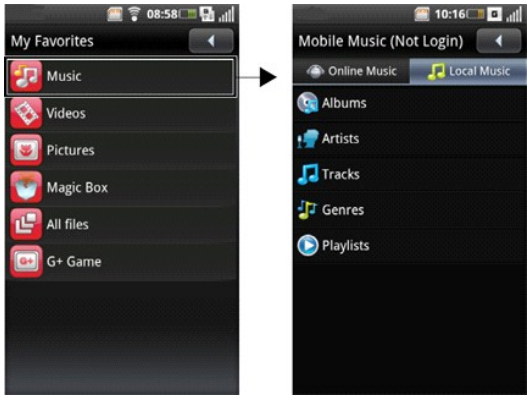
Tap **My Favorites** from the Home screen to open the My Favorites screen.

- Music
- Music Player
- Videos
- Picture Application
- Using the Camera
- Using the Recorder Application

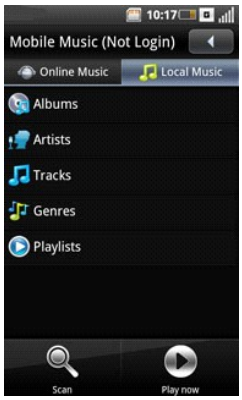
Music

1 In the Home screen, tap the My Favorites icon, and then tap **Music**.

Your music is organized into five categories: **Albums, Artists, Tracks, Genres,** and **Playlists**. Select a category to view the lists within each.

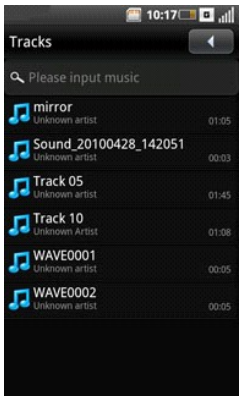


2 To play all the songs in your library, press the **Options** button and then tap **Play now.**



3 To browse all audio files on the phone including the **SIM** card and the microSD card, press the **Options** button and then tap **Scan**.

4 Double-tap any song to start playing the song.

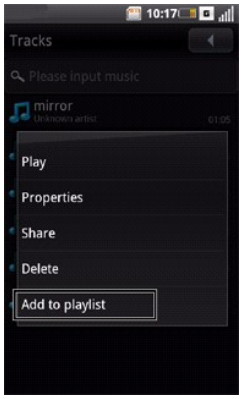


To create a playlist::

1 From the Tracks screen, select a category.

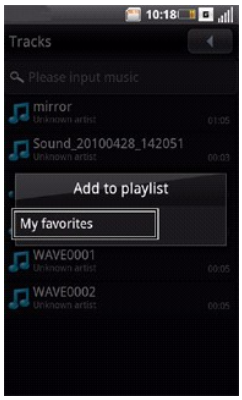
2 From the list that appears, navigate to the artist, album, or song that you want on a playlist.

3 Tap and hold the artist, album, or song to open the pop-up menu. Tap **Add to playlist.**



NOTE: You can also use this menu to **Play**, change **Properties**, **Share**, or **Delete** the songs.

4 In the **Add to playlist** menu that opens, select **My favorites** or any other playlist you created.

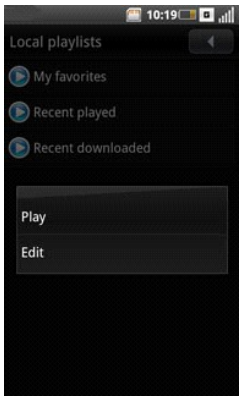


The selected song(s) are added.

To manage playlists:

Go to the **Music** screen and select **Playlists.** The available playlists appear on the screen.

Select the playlist to play the songs in the list.



Tap and hold the playlist to open the pop-up menu and select **Play** to play the songs.

To exit this screen tap the **Back** icon.

To set a song as the ringtone:

1 Tap the song you want to set as the ringtone.

2 Press the **Options** button and then select **Set ringtone.** The ringtone is set as your default incoming call ringtone.

Music Player

1 To open the Music Player, tap an audio file. The Music Player appears on the screen.

1 Time elapsed

2 Progress bar

3 Album

4 Artist

5 View current playlist

6 Shuffle mode

7 Repeat songs

Tap to play the next video

Tap to play the previous video

Picture Application

To open the Picture application:

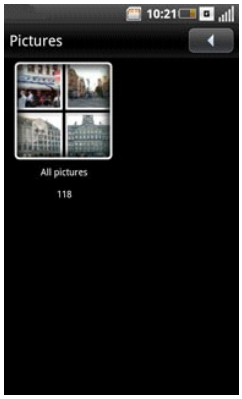
1 Tap My **Favorites** on the Home screen.

2 Tap **Pictures** on the My Favorites screen.

Browsing Pictures

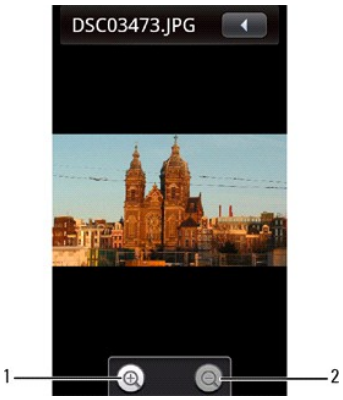
Your pictures are grouped into folders.

1 Tap a folder to view its contents.



2 Tap a thumbnail to view the photo in full screen view.

3 Tap anywhere on the screen to display the **Zoom in** and **Zoom out** icons.



NOTE: Multi-touch is enabled to reduce or enlarge the size of images on the screen.

1 **Zoom in** icon

2 **Zoom out** icon

4 Tap the Zoom in icon to enlarge the view of the picture and Zoom out icon to reduce the view of the picture.

5 Swipe to the left or right to go to the previous or next picture.

6 Press the **Options** button and then tap **Properties** to view the properties of the selected picture.

7 To exit this screen, tap the **Back** icon.

To rotate a picture:

1 Tap a thumbnail to view the photo in full screen view.

2 To rotate the picture, press the **Options** button to open the Options panel.

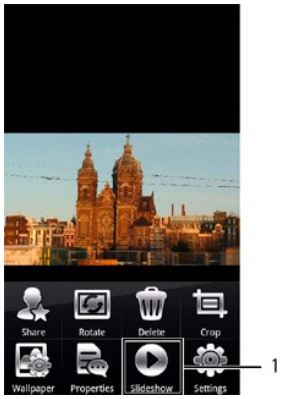
3 Tap **Rotate**, and then tap **Rotate left** or **Rotate right** to rotate the picture.

4 To exit this screen, tap the **Back** icon.

To view the pictures as a slideshow:

1 Press the **Options** button in either the thumbnail view or the full screen view to open the Options panel.

2 Tap the **Slideshow** icon to begin slideshow.



1 **Slideshow** icon

3 Tap anywhere on the screen to stop the slideshow.

4 To exit this screen, tap the **Back** icon.

Managing Picture Files

To delete a picture:

1 Tap the thumbnail of the picture you want to delete to view the picture in full screen view.

2 Press the **Options** button and then tap **Delete** to delete the picture.

3 Tap **OK** to confirm.

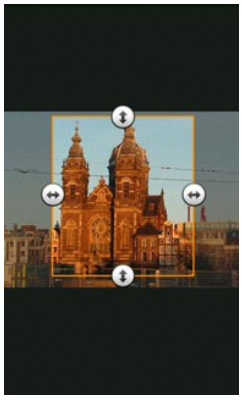
To crop a picture:

1 Tap the thumbnail of the picture you want to crop.

2 Press the **Options** button then tap **Crop** to open the crop screen.

3 Tap and hold an edge of the frame to reveal the sizing arrows, then drag the edge in or out to fix the crop size.

Tap and slide the center of the frame to move it within the picture.



4 Press the **Options** button and then tap **Save** to save the cropped picture as a new copy and exit the screen.

To share pictures:

1 Tap the thumbnail of the picture you want to share.

2 Press the **Options** button then open the Options panel.

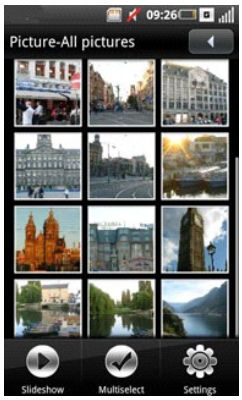
3 Tap **Share** to open the pop-up menu.

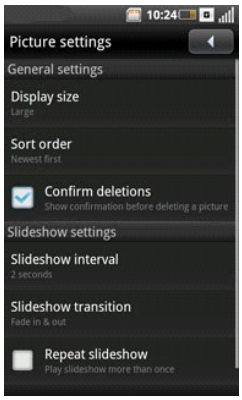
4 Select your application for sharing from the menu to open the Compose screen.

5 Complete your message and tap **Send** to send the message with the picture and return to the main screen.

Changing Picture Settings

To open the Picture settings, press the **Options** button and then tap **Settings**.





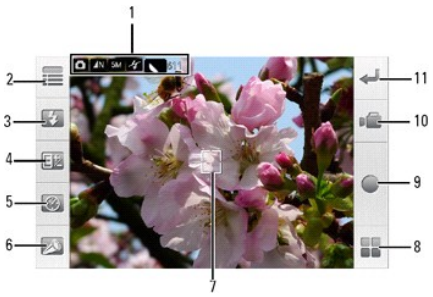
The following are the available picture settings:

- **Display size —** You can select from Large or Small picture display sizes.
- **Sort order —** You can select to sort pictures with the latest pictures first or latest pictures last.
- **Confirm deletions** — Select this check box if you want confirmations before deleting pictures.
- **Slideshow interval —** Select the duration each slide appears on the screen. The options available are 2, 3, or 4 seconds.
- **Slideshow transition —** Select the effect used when moving from one slide to another. The options available are Fade in & out, Slide left-right, Slide up-down, and Random.
- **Repeat slideshow —** Select this check box to play the slideshow more than once.
- **Shuffle slides —** Select this check box to shuffle your pictures in the slideshow.

Using the Camera

You can use the camera to take photos and video clips.

To activate camera, tap **Camera** from the Home screen. Camera screen is displayed in landscape view.



1 Indicates current capture settings (Camera mode, Image quality, Image size, Flash, ISO)

2 **Settings** icon

3 **Flash setting** icon

4 **Exposure compensation setting** icon

5 **Self Timer** icon

6 **Zoom** icon

7 **Focus frame**

8 **Go to Pictures** icon

9 **Capture** icon

10 **Switch** to **Video** icon

11 **Exit** icon

Using the camera:

Half press the **Camera** button to focus on the image.

Full press the **Camera** button or tap the **Capture** icon to capture photos.

Tap the **Settings** icon to set up **Grid View, Image size, Saturation, Sharpness, Effect, WB,**and **Contrast**.

Tap the **Flash setting** icon to enable or disable flash.

Tap the **Exposure compensation setting** icon to set exposure compensation.

Tap the **Self Timer** icon to set the timer.

Tap the **Zoom** icon to adjust the zoom.

Tap the **Switch to Video** icon to switch to video recorder mode.

Tap the **Go to Pictures** icon to open the Pictures screen and view pictures.

Tap the **Exit** icon to exit the Camera screen.

Using Video Recording Mode

1 **Video mode** indicator

2 **Settings** icon

3 **Exposure compensation settings** icon

4 **Self timer** icon

5 **Focus frame**

6 **Go to Videos** icon

7 **Capture / Stop** icon

8 **Switch to Camera** mode

9 **Exit** icon

Using the video camera:

Press the **Camera** button or tap the **Capture** icon to start video recording. Press the **Camera** button again or tap the **Stop** icon to stop video recording.

Tap the **Settings** icon to set up **Mute, Video Quality, Effect,** and **WB**.

Tap the **Exposure compensation setting** icon to set exposure compensation.

Tap the **Self Timer** icon to set the timer.

Tap the **Zoom** icon to adjust the zoom.

Tap the **Switch to Camera** icon to switch to camera mode.

Tap the **Go to Videos** icon to open the Videos screen and playback videos.

Tap the **Exit** icon to exit the Video Recording screen.

Using the Recorder Application

The Recorder feature allows you to capture audio notes for yourself.

To open the Recorder, tap **Sound Recorder** from the Home screen.

1 **Start recording** icon

2 **Playback** icon

3 **Stop** icon

Using the Recorder:

Tap the **Start recording** icon to start recording.

Tap the **Stop** icon to stop recording or playback.

Tap the **Playback** icon to playback recording.

Using Applications

Dell™ Mini 3v User's Guide

- Mobile Video
- Mobile TV
- Using Mobile Reader
- Using Navigation
- Using PIM
- Using Lingtu
- Messaging
- Calendar
- Alarm Clock
- Calculator
- File Manager
- Notes
- To Do List
- World Clock
- Applications
- Search
- Backup
- Restore
- DCD
- Quickoffice
- PC Sync Tool

This section provides information about the additional applications available on your smartphone.

Mobile Video

Mobile Video allows you to watch news, sports, weather, entertainment, and more.

Tap **Mobile Video** from the Home screen to open the Mobile Video screen.

NOTE: Additional data charges may be incurred when using this application. Contact your service provider for more details.

Mobile TV

Mobile TV allows you to watch TV in broadcast quality using your smartphone.

Tap **Mobile TV** from the Home screen to open the Mobile TV screen. The phone automatically searches for channel frequencies.

NOTE: Additional data charges may be incurred when using this application. Contact your service provider for more details.

Press the **Options** button to perform the following functions:

- To rescan frequencies, tap **Rescan**.
- To watch recorded programs saved in the SD card, tap **My Video**.
- To change settings, tap **Settings**.

Mobile TV Settings

The following options are available from the Mobile TV settings screen.

- **Auto Record**— Select to enable this feature. When enabled, the TV program is automatically recorded in the SD card when a call is received.
- **Scanning Type**— Tap to select the scanning type. Available options are:
  - **By City**— Scans frequencies by city.
  - **All Frequency**— Scans all availble frequencies.
  - **User Defined**— Allows user to enter specific frequencies to scan.
- **Current City**— Tap to select the city. This option is only available when the **Scanning Type** is set to **By City**.

- **User Defined**— Tap to enter the frequency, and then tap **OK**. This option is only available when the **Scanning Type** is set to **User Defined**.

Using Mobile Reader

Mobile Reader allows you to read and download e-books, comics, and magazines using your smartphone.

Tap **Mobile Reader** from the Home screen to open the Mobile Reader screen.

NOTE: Additional data charges may be incurred when using this application.

Contact your service provider for more details.

- To log on to the Mobile Reader, tap **Login**.
- To download contents, tap **Download**.
- To change the settings, tap **Settings**.
- To view help, tap **Help.**
- To exit the Mobile Reader, tap **Exit.**

Using Navigation

Navigation is a paid internet based navigation system that allows you to find your current location, special interest point in any area and guide you to your chosen destination.

Tap **Navigation** from the Home screen to open the Navigation screen.

Using PIM

PIM is a personal information manager paid service from the operator. It allows you to backup or restore your phonebook entries online.

Tap **PIM** from the Home screen to open the PIM screen.

Using Lingtu

Lingtu is a pre-loaded GPS and map system that helps you locate your location and provide a real time turn by turn direction to your chosen destination.

Tap **Lingtu** from the Home screen to open the Lingtu screen.

Messaging

You can send and receive text messages using the Messaging application. To open Messaging, tap **Messaging** from the Home screen.

To read unread messages:

The **Unread Messages** icon indicates unread messages received from the contacts on your Messaging list.

1 Tap Messaging from the Home screen to open the Messaging screen.

2 To read a message, tap the contact with the unread message.

To reply to a message:

1 In the Home screen, tap **Messaging** to open the Messaging screen.

2 Select a contact from the Messaging list to open the Compose screen.

3 Enter your message.

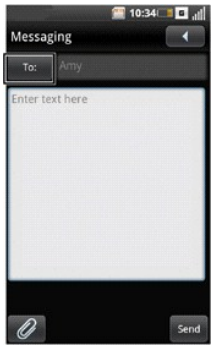
4 Tap **Send**.

To send messages to contacts:

1 In the Home screen, tap **Messaging** to open the Messaging screen.

2 Tap **New** to open the Compose screen.

3 Tap **To:** to open Contacts and select the check boxes that appear beside the contacts you want to message.



1 Check boxes

2 **Select** icon

3 **Select all** icon

4 Press the **Options** button and tap **Select** or **Select All** on the Options panel to send the message.

5 Enter your message.

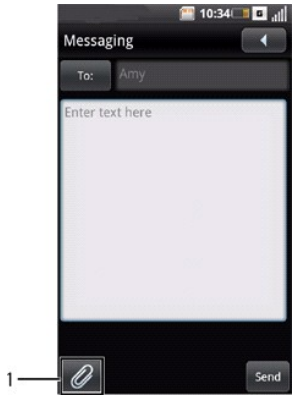
6 Tap **Send**.

To attach files to your message:

1 In the Home screen, tap **Messaging** to open the Messaging screen.

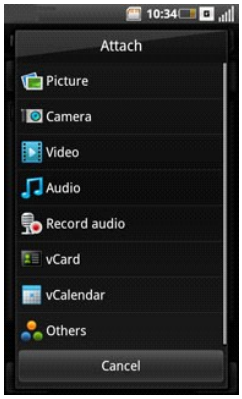
2 Tap **New** to open the Compose screen.

3 In the Compose screen, tap the **Attachment** icon.



1 **Attachment** icon

4 Tap an option to select the type of file you want to attach, and then select the file.



5 Enter your message.

6 Tap **Send**.

To add more information to your message:

1 Tap **Messaging** from the Home screen to open the Messaging screen.

2 Tap **New** to open the Compose screen.

3 In the Compose screen, press the Options button to open the **Options** panel.

4 You can use the Options panel for functions including **Add subject, Add page, Discard** and **Save Draft.**

1 Options panel functions

Viewing Messages

You can view messages in the **Message View** or **Folder View screen.** To change view, press the **Options** button, and then tap either **Message View** or **Folder View**, then tap a message. In the Message View screen, messages are listed as grouped conversations or message threads that are sent to and received from a contact.

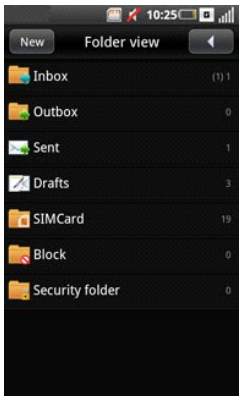
In the Folder View screen, messages are sorted according to message folders.

To view messages in Folder View:

1 In the Home screen, tap **Messaging** to open the Messaging screen.

2 On the Message view screen, press the **Options** button and tap **Folder View** on the Options panel.

3 Select a folder such as **Inbox, Outbox, Sent, Drafts, SIMCard, Block,** or **Security Folder** to read your messages.



To backup your messages:

1 Tap **Messaging** from the Home screen to open the Messaging screen.

2 Press the **Options** button and tap **Backup** to open the Backup screen.

1 **Backup** tab

2 Check boxes

3 **To Storage Card** icon

3 Select the **Backup** tab on top to view the Backup screen.

4 Select the check boxes to choose the items to back up.

5 Tap To **Storage Card** to start backing up data.

To restore your messages:

1 In the Home screen, tap **Messaging** to open the Messaging screen.

2 Press the **Options** button and select **Backup** to open the Backup screen.

3 Select the **Restore** tab on top to view the Restore screen.

4 Select a restore source to start restoring your data.

Messaging Settings

This section provides information on changing the Messaging Settings including SMSC, Expiry time, Delivery reports, Read reports, Auto-retrieve, Roaming auto-retrieve, Data Connection, Service Center, and Signature.

To edit your Messaging settings, press the **Options** button at the Messaging screen and select **More > Settings**.

The following are the available settings:

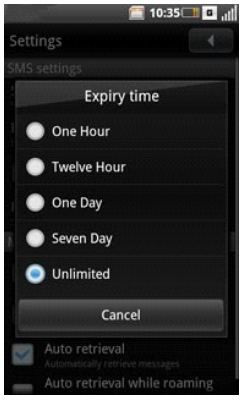
SMSC

Select this setting to enter the short message service center number. Contact your service providers for this information.

Tap **OK** to save and exit.

Expiry Time

Select this setting to set the short message expiry time. The available options are O**ne Hour, Twelve Hour, One Day, Seven Day,** and **Unlimited.**



Delivery Reports

Select this check box to request a delivery report for each message you send.

Forward Settings

Select this setting to show or hide the sender when forwarding messages.

Delivery Reports

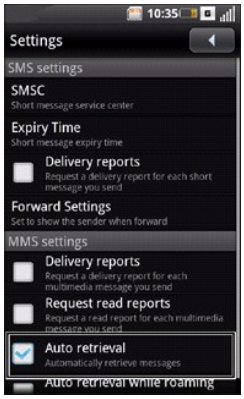
Select this setting to request a delivery report for each multimedia message you send.

Request Read Reports

Select this check box to request a read report for each message you send.

Auto-retrieval

Select this check box to retrieve messages automatically.



Auto-retrieval while roaming

Select this check box to retrieve messages automatically while roaming outside of your service area.

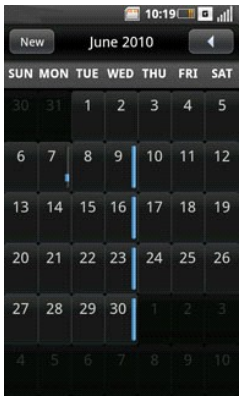
Calendar

The Calendar allows you to assign events such as appointments or specific tasks to a date or time and receive reminders for those events. You can view your events in a continuous list, by day, by week, or by month. To open the Calendar, tap **Calendar** from the Home screen.

Calendar Views

Month view

The blue color on vertical bars on each date represent events you have added.



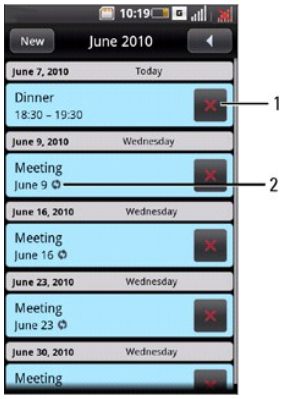
To view event details, select a day to view all events in that day then select an event to view its details.

To navigate months, slide left or right through the days and past the beginning or end of the month to move to the previous or next month.

To quickly view the current day events, press the **Options** button and select **Today**.

Agenda view

Agenda view displays all events in the current month.



1 Delete icon

2 **Recurring events icon**

Select the event to view its details.

Recurring events are marked with the **Recurring events** icon.

To navigate to a past or future month, slide a finger to the stylus to the left or right on the screen.

To quickly view the current day events, press the **Options** button and select **Today**.

To exit the screen, tap the **Back** icon.

Week view

Events are shown as blocks in week view.

Select an event to open the pop-up window that displays more event information. Tap the pop-up window to view the event details.

To navigate within the current week, slide up or down on the screen. To navigate to a past or future week, slide a finger or the stylus to the left or right on the screen.

To quickly view the current day events, press the **Options** button and select **Today**.

To exit the screen, tap the Back icon.

Day view

Events are shown in tiled format and span the time they last. All-day events are displayed at the top of the day list.

Select an event to open the window that displays more event information.

To navigate within the current week, slide up or down on the screen.

To navigate to a past or future week, slide a finger or the stylus to the left or right on the screen.

To quickly view the current day events, press the **Options** button and select **Today**.

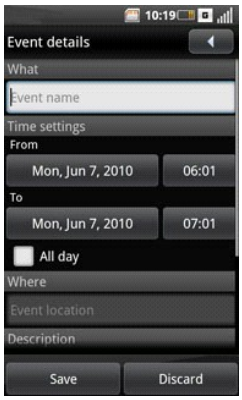
To exit the screen tap the **Back** icon.

Using the Calendar

To add a new event:

1 In the Home screen, tap **Calendar** to open Calendar.

2 Tap **New** or select a date or time in the calendar to open the Event details screen.



3 Select the duration of the event and enter event details and set reminders if required.

4 Tap **Save** to save and exit.

To edit an event:

To edit an event, select the event to view its details then press the **Options** button to select **Edit event** on the Options panel.。

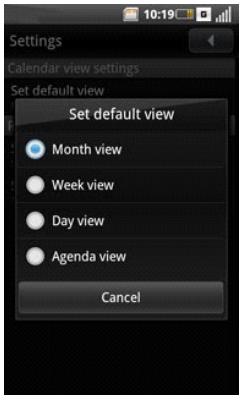
To exit the screen, tap the **Back** icon.

To edit the calendar settings:

Press the **Options** button and select **Settings** on the Options panel. You can set up **Set default view, Set alert & notifications,** and **Set default reminder** in Calendar Settings.

To set the default view:

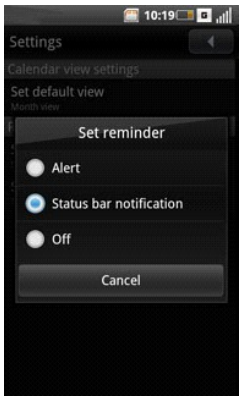
Select this setting to set the default view for your calendar. You can set your default view to Month view, Week view, Day view, or Agenda view.



To exit the screen, tap the **Back** icon.

To set alerts and notifications:

Select this setting to set the type of event reminder you want. You can choose **Alert, Status bar notification,** or **Off.**



To exit the screen, tap the **Back** icon.

To set the default reminder:

Select this setting to set the default reminder time for your events.

To exit the screen, tap the **Back** icon.

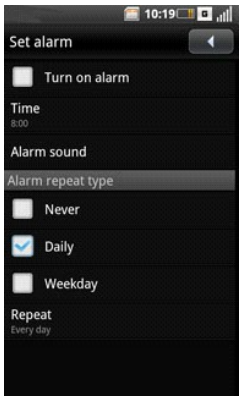
Alarm Clock

To use Alarm Clock, tap **Alarm Clock** from the Home screen.

To set an alarm:

1 In the Home screen, tap the Alarm Clock icon to open the Alarm Clock.

2 Select one of the default alarms to open the Set Alarm screen.



3 Select **Time** to set the alarm time.

4 Select **Alarm sound** to set the alarm sound.

5 Select Repeat to select the days of the week to repeat the alarm. If you want the alarm for one time only, you do not have to select any option in the **Alarm repeat type** section.

6 Select the **Turn on Alarm** check box to turn on the alarm.

7 To exit the screen, tap the **Back** icon.

To add multiple alarms:

1 In the Home screen, tap the **Alarm Clock** icon to open Alarm Clock.

2 Tap **New**.

To change the clock display:

1 In the Home screen, tap the **Alarm Clock** icon to open Alarm Clock.

1 **Clock**

2 Tap the clock to open the Select clock screen.

3 Slide a finger or the stylus to the left and right to browse through the selections at the bottom of the screen and tap to select the clock you prefer.

To hide the clock:

1 In the Home screen, tap the **Alarm Clock** icon to open Alarm Clock.

2 Press the **Options** button to open the Options panel.

3 Select **Hide clock** on the Options panel.

1 **Hide clock** icon

4 To exit the screen, tap the **Back** icon.

To set the date and time:

See "Date & Time Settings"

Calculator

The calculator allows you to perform basic mathematic calculations. To open the Calculator, tap the **Calculator** icon on the Home screen.

1 **Clear** icon

- Tap the **Clear** icon to clear your entry.
- Use the numeric keys to enter numbers.
- Use +, -, x, ÷, = to perform calculations.
- To exit the screen, tap the **Back** icon.

File Manager

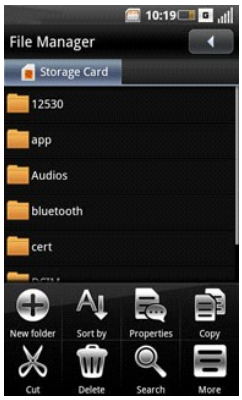
The File Manager allows you to browse and manage the contents of your memory card and phone. To open the File Manager, tap the **File Manager** icon on the Home screen.

To view saved files:

1 In the Home screen, tap the **File Manager** icon to open the File Manager.

2 Tap the **SD Card** tab to view files saved in the microSD card or tap the **Phone** tab to view files saved on the phone.

3 Select a folder to view files inside the folder.



4 To exit the screen, tap the **Back** icon.

To add new folders:

1 In the Home screen, tap the **File Manager** icon to open the File Manager.

2 Press the **Options** button and tap **New folder** on the Options panel.

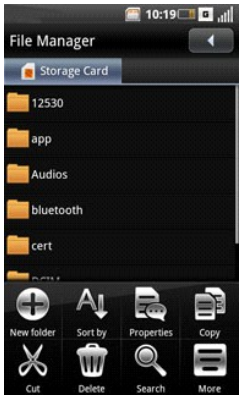
3 Enter the folder name and tap **OK**.

To sort files and folders:

1 In the Home screen, tap the **File Manager** icon to open the File Manager.

2 Press the **Options** button and tap **Sort by** on the Options panel.

3 Select **Name, Size, Time,** or **Type** to sort your files and folders by name, size, date, or type.



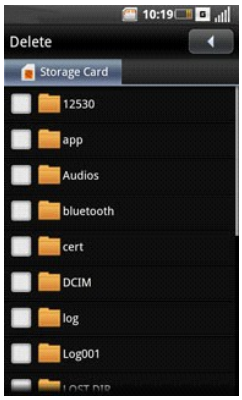
4 To exit the screen, tap the **Back** icon.

To delete files and folders:

1 In the Home screen, tap the **File Manager** icon to open the File Manager.

2 Press the **Options** button and select **Delete** on the Options panel.

3 Select the check boxes that appear beside the files or folders you want to delete.



NOTE: To delete a file or folder directly, tap and hold the file or folder and then tap **Delete** in the pop-up menu that appears.

4 Press the **Options** button and tap **Delete** on the Options panel, and then tap **Yes** to confirm deletion.

To cut, copy, and paste files and folders:

1 In the Home screen, tap the File Manager icon to open the **File Manager.**

2 Press the **Options** button to open the Options panel.

3 Tap **Cut** to cut, or **Copy** to copy.

4 Tap to select the check boxes that appear beside the files or folders you want to cut or copy.

NOTE: To select a file or folder directly, tap and hold the file or folder and then tap **Cut** or **Copy** in the pop-up menu that appears.

5 Press the **Options** button and tap **Copy** or **Cut** on the Options panel.

6 Tap to select a folder or storage for insertion.

7 Press the **Options** button and tap **Paste** to move the files or folders to the new destination.

8 To exit the screen, tap the **Back** icon.

To search for contents:

1 In the Home screen, tap the **File Manager** icon to open the File Manager.

2 Press the **Options** button and tap **Search** on the Options panel. The Search screen appears.

3 Enter your search terms and tap the **Search** icon to begin the search.

4 Your search results are sorted by categories and listed in tabs. Tap the tabs to view the search results.

5 To exit the screen, tap the **Back** icon.

To change the view:

1 In the Home screen, tap the File Manager icon to open the **File Manager**.

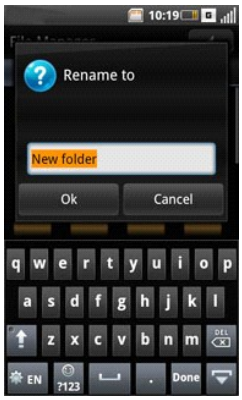
2 Press the **Options** button and tap **More** > **Icon view** or **More** > **List view** on the Options panel to change the view.

To rename files or folders:

1 In the Home screen, tap the **File Manager** icon to open the File Manager.

2 Tap and hold the file or folder you want to rename to open the pop-up menu.

3 Tap **Rename** on the pop-up menu to open the rename screen.



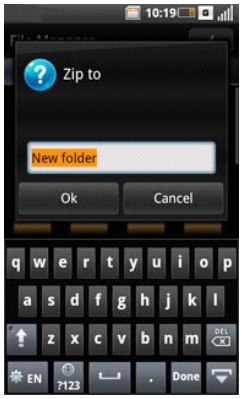
4 Enter the new name and tap **OK** to save and exit the screen.

To compress files or folders:

1 In the Home screen, tap the **File Manager** icon to open the File Manager.

2 Tap and hold the file or folder you want to compress to open the pop-up menu.

3 Tap **Compress** on the pop-up menu to open the **Zip to screen.**



4 Enter a name for your zip file, and tap **OK** to save and exit the screen.

To decompress files or folders:

1 Tap the zipped file or folder to open **Unzip to screen.**

2 Enter a name for your unzip file and tap **OK** to save and exit the screen.

Notes

In the Home screen, tap the **Notes** icon to open the Notes screen.

To add notes:

1 In the Home screen, tap the **Notes** icon to open Notes.

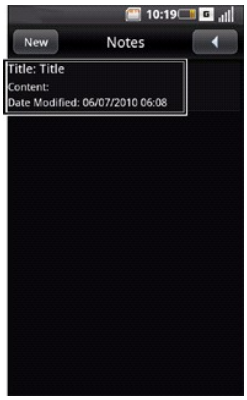
2 Tap **New** to open the Create note screen.

3 Enter the title and the content.

4 Tap **Save** to save and exit the screen.

To read notes:

Notes are listed by date added, with the most recent note at the top. You can see the title of each note in the list. Select the note to view its details.



To exit the screen, tap the **Back** icon.

To edit notes:

1 In the Home screen, tap the **Notes** icon to open Notes.

2 Tap the note you want to edit to view its details.

3 Make the required edits to the note.

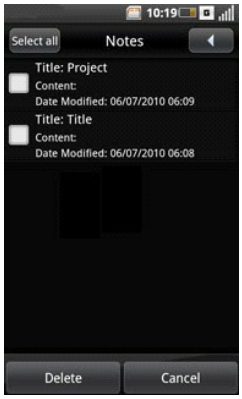
4 Tap **Save** to save and exit the screen.

To delete notes:

1 In the Home screen, tap the **Notes** icon to open Notes.

2 Press the **Options** button, and then tap **Delete** on the Options panel.

3 Tap to select the check boxes that appear beside the notes you want to delete.



4 Tap **Delete** to delete the note.

5 To exit the screen, tap the **Back** icon.

To Do List

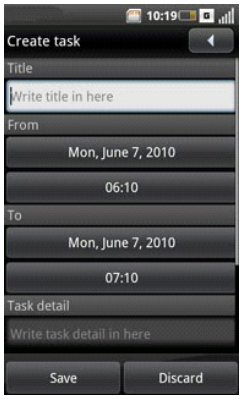
The To Do List allows you to keep track of tasks you need to do. To open the To Do List, tap **To Do List** icon on the Home screen.

To create new tasks:

1 In the Home screen, tap the **To Do List** icon to open To Do List.

2 Tap **New** to open the Create Task screen.

3 Enter the task title, date and time, task details, priority, and status.



4 Tap **Save** to save and exit the screen.

5 To exit the screen, tap the **Back** icon.

To edit a task:

1 In the **To Do List** screen, tap the task you want to edit.

The Edit Task screen opens.

2 Make the required edits to the task.

3 Tap **Save** to save and exit the screen.

To delete a task:

1 In the **To Do List** screen, press the **Options** button and tap **Delete** on the Options panel.

2 Tap to select the check boxes that appear beside the tasks you want to delete.

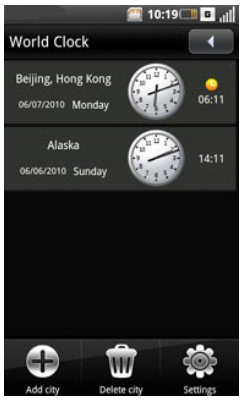
3 Tap **Delete** to delete the task.

World Clock

World Clock allows you to view and add the time in other major cities and time zones around the world. To open World Clock, tap the **World Clock** icon on the Home screen.

To view clocks:

1 In the Home screen, tap the **World Clock** icon to open World Clock.



2 Slide up and down on the screen to browse the clocks.

To add clocks:

1 In the Home screen, tap the **World Clock** icon to open World Clock.

2 Press the **Options** button and tap **Add City.**

3 Tap the city or time zone for which you want to add a clock.

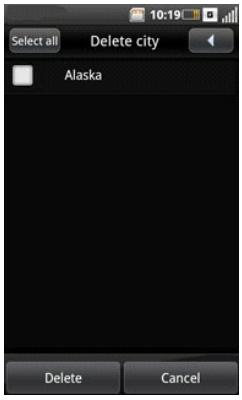
4 Press the **Options** button and tap **Ok** on the Options panel.

To delete clocks:

1 In the Home screen, tap the **World Clock** icon to open World Clock.

2 Press the **Options** button and tap **Delete City** to open the Delete City screen.

3 Tap to select the check boxes that appear beside the names of the clocks you want to delete.



4 Tap **Delete**.

5 Tap **Ok** to confirm deletion and exit the screen.

To change clock settings:

The **Date and time settings** appear when you select **Setting** from the Options panel. See "Date & Time Settings" for set up instructions.

Applications

Program Manager

The Program Manager allows you to manage your programs. To open Program Manager, tap **Applications** from the Home screen, and then tap **Program Manager**.

Toolbox

The Toolbox allows you to manage installed programs on your device. To open Toolbox, tap **Applications** from the Home screen, and then tap **Toolbox**.

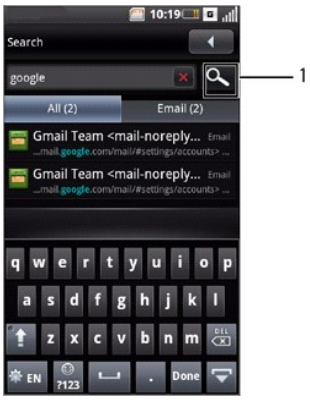
Search

Tap the **Search** icon on the Home screen to open Search.

Using Search

To perform a simple search:

1. In the Home screen, tap the **Search** icon to open Search.



1 **Search** icon

2. Enter your search terms and tap the **Search** icon to begin the search.

You can also find the Search bar at the top of the Home screen.

3. The search results are sorted by categories and listed in tabs. Tap the tabs to view the search results.

To perform an advanced search:

1 Tap the **Search** icon on the Home screen to open Search.

2 Press the **Options** button and tap **Advanced**.

The Advanced Search screen appears.

3 Select the drop-down menu to select your search preference: **Contacts, Message, Email, File, Call log,** or **Web History.**

1 In the Home screen, tap the **Search** icon to open Search.

2 Press the **Options** button and tap **Index** on the Options panel. The Index statistic screen appears.

3 Slide a finger or the stylus up and down on the screen to view the entire list.

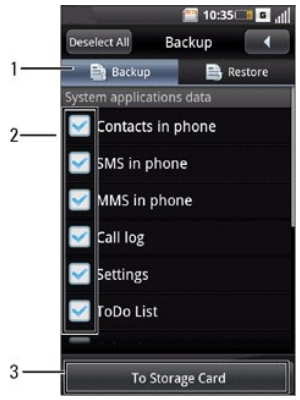
4 Tap the **Back** icon to exit the screen.

Backup

Use Backup to backup and restore your contacts, messages, and files.

1 In the Home screen, tap the **Backup** icon to open the Backup screen.

2 By default, the Backup screen is displayed. If not, select the **Backup** tab at top of the screen to view the Backup screen.



1 **Backup** tab

2 check boxes

3 **To Storage Card** icon

3 Select the check boxes to choose the items you want to backup.

4 Tap **To Storage Card** to start backing up your data to the storage card.

Restore

1 In the Home screen, tap the **Backup** icon to open the Backup screen.

2 Tap the **Restore** tab at the top of the screen to view the Restore screen.

3 Select the restore source to start restoring your data.

DCD

DCD is a data service from the China Mobile Communications Corporation (CMCC). After you order the channels, news will be delivered to your mobile phone and will be shown on the idle screen. If International Roaming is inactive, no data fee will be charged when you use the service (including when you open WAP pages of the service).

Tap **DCD** from the Home screen to open the DCD screen.

To view the DCD channels:

1. In the Home screen, tap the **DCD** icon to open DCD.

2. Select a Channel to view its details.

To change the DCD settings:

Press the **Options** button and select **More > Config** to open DCD settings.

The following settings are available:

Connection

Use this setting to select connection modes.

Scrolling

Use this setting to select scrolling speed.

Read-Items Display

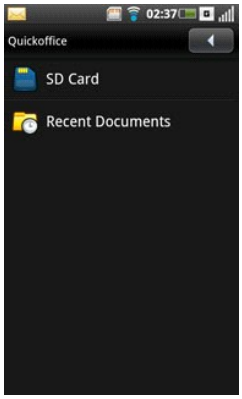
Use this setting to show or hide read items.

Close DCD Window

Use this setting to show or hide the DCD Window.

Quickoffice

Quickoffice allows you to view and edit Microsoft® Powerpoint files, and create Microsoft Word and Microsoft Excel spreadsheets.



To create new files:

1 Tap **Quickoffice** from the Home screen.

2 Tap **SD Card.**

3 Press the **Options** button, then tap **Create document.**

4 Select the type of document to create from the pop-up a menu.

5 Press the **Options** button, then tap **Keyboard** to display the on-screen keyboard.

6 Type the contents of your file.

7 Press the **Options** button, and then tap **Save**.

8 Tap **SD Card** to save the file in the SD card.

9 Enter the file name, and then tap **Save** to save.

To view files:

1 Tap **Quickoffice** from the Home screen.

2 Tap the location of the file to view: **SD Card** or **Recent Documents.**

3 Browse and tap the file name to open the file.

To zoom-in or zoom-out, tap the screen to display the zoom buttons, then tap the **Zoom in** or **Zoom out** icon.

To change the display mode, press the **Options** button, then tap **Display mode.**

To edit files:

1 Tap **Quickoffice** from the Home screen.

2 Tap the location of the file to view: **SD Card** or **Recent Documents**.

3 Browse and tap the file name to open the file.

To display the keyboard, press the **Options** button, then tap **Keyboard**.

To change font format, press the **Options** button, then tap **Format**.

PC Sync Tool

The PC Sync tool allows you to synchronize the information on your computer with the information on your smartphone. Synchronization compares the data on your smartphone with your computer and updates both the computer and your smartphone with the most recent information. Using the PC sync tool, you can:

- Synchronize information to have the latest information in all locations.
- Transfer files between your smartphone and a computer.
- Backup data stored on the smartphone.

Installing the PC Sync tool

Before you can synchronize information, you must install the PC Sync Tool on your computer.

Installing PC Sync tool from the microSD card back up folder on your computer (preferred):

1 Backup the data from the microSD card to your computer.

2 From the microSD card back up folder on your computer, open the **ODS** (Ophone Desktop Suite) folder.

3 In the **ODS** folder, double-click the file titled **ODS** to start the installation. Follow the instructions on the wizard to complete the installation (Windows Vista® , Windows® XP or Windows 7 (32- and 64-bit)).

NOTE: The driver is installed automatically once the ODS installation is completed. You can also install the driver separately by double-clicking the file titled **Driver** in the **ODS** folder.

Installing PC Sync tool from the microSD card:

1 Backup the data from the microSD card to your computer.

2 Connect your phone to a USB connector on your computer using the USB to Micro-USB cable that came with your phone.

3 In the Menu that appears on the screen, select **UMS Mode** (USB Mass Storage Mode).

Your computer displays the phone memory as a **Removable disk (X:)** in **My Computer,** where X is the drive letter on your computer. The drive letter on your computer may vary.

4 Double-click **Removable disk (X:).**

5 In the **ODS** folder, double-click the file titled **ODS** to start the installation. Follow the instructions on the wizard to complete the installation (Windows Vista® , Windows® XP or Windows 7 (32- and 64-bit)).

Connecting the smartphone

After installing the PC Sync Tool, connect USB cable to the micro USB port on the smartphone and to a computer.

NOTE: You will be prompted to change the phone USB mode. Select SYNC MODE to enable synchronization through the USB cable.

Using the PC Sync Tool

Once the connection is established between your smartphone and the computer, you can start synchronization.

The information you can synchronize include Contacts, Calendar, Task, Messaging, Email and Note.

To synchronize data:

1 Select the information you want to synchronize such as Contacts, Calendar, Task, Messaging, Email and Note.

2 Select **Sync** to synchronize the files.

To add new data:

1 Select the information you want to add such as Contacts, Calendar, Task, Messaging, Email and Note.

2 Select **New** to add new data.

To delete data:

1 Select the information you want to delete such as Contacts, Calendar, Task, Messaging, Email and Note.

2 Select **Delete** and then select **OK** to delete the data.

To backup data:

1 Select **Device** and then select **Backup/Restore.**

2 Select the **Backup** option, specify the backup file name and location to save the file, then click **Open**.

3 Select the information you want to backup such as Contacts, Calendar, Task, Messaging, Email and Note and click **Next**.

4 Select **Next** to start backing up the data and click **Finish** to complete.

To recover data:

1 Select **Device** and then select **Backup/Restore.**

2 Select the **Restore** option, specify the location of the backup file and click **Open**.

3 Select **Next** to begin restoring the data and click **Finish** to complete.
